Gottscheer Volkslieder Vol 1:

Central European Folk Music Philip V. Bohlman, 2013-10-28 This is the first annotated bibliography in German or English to gather the rich sources for German language folk music scholarship. It presents a comprehensive view of both historical and contemporary trends in a field embracing folkloristics and ethnomusicology as well as philological and cultural studies. Beginning with early theories of folk song formulated by Herder, Goethe, the Brothers Grimm and others, the book examines the most important collections of the 19th century folk song movement and surveys the 20th century institutions and publications that have made folk music scholarship essential to an understanding of German speaking Europe. The book represents the enormous diversity of folk music. Ideas of genre and classification contrast with the ways in which minority and ethnic groups have contributed to the complex constructs of 19th and 20th century nationalism. The intellectual history in this book often takes the form of a clash between institutions and the forceful personalities of scholars who theorized that folk music was the product of individuals or the linguistic core of nations. Entries that illustrate the ways in which constructs of folk music have contributed to the politics of culture, e.g. in Nazi Germany or in the workers culture of the former German Democratic Republic, also constitute the expansive musical landscape covered by this book. The author includes diverse disciplinary perspectives, not just those of folklorists but also concepts from ethnomusicology, historical musicology and religious and cultural studies. In addition to traditional studies of the canons of German folk music, e.g. ballads and singing society repertoires, Bohlman includes studies of religious and ethnic minorities and of German folk music in nations and regions outside Central Europe. The comprehensive nature of this book not only makes available a rich history of scholarship but also contextualizes Central European folk music as a vital and critical discipline for the interpretation of a changing Europe. Includes index.

Music and German National Identity Celia Applegate, Pamela Potter, 2002-08 Concert halls all over the world feature mostly the works of German and Austrian composers as their standard repertoire. Composers like the three Bs of classical music, Bach, Beethoven and Brahms, all of whom are German. Over the past three centuries many supporters of German music have even nurtured the notion that the German speaking world possesses a peculiar strength in the cultivation of music. This book brings together seventeen contributors from the fields of musicology, ethnomusicology, history and German literature to explore these questions: how music came to be associated with German identity, when and how Germans came to be regarded as the people of music, and how music came to be designated the most German of arts. Unlike previous volumes on this topic, many of which focused primarily on Wagner and Nazism, the essays here are wide ranging and comprehensive, examining philosophy, literature, politics and social currents as well as the creation and performance of folk music, art music, church music, jazz, rock and pop. The result is a striking volume adeptly addressing the complexity and variety of ways in which music insinuated itself into the German national imagination and how it has continued to play a central role in the shaping of a German identity. Contributors to this volume: Celia Applegate, Doris L. Bergen, Philip Bohlman, Joy Haslam.
