El Proyecto Habana:

El proyecto Habana : arquitectura otra vez ; conferencia internacional sobre arquitectura, La Habana, Cuba ; con Coop Himmelb(l)au / Wolf Prix, Morphosis / Thom Mayne, Eric Owen Moss, Carme Pinós, Lebbeus Woods, C.P.P.N. Peter Noever, Wolf D. Prix,1999 *El proyecto local* Italia Magnaghi, Alberto,2011-11-09 Para quienes estamos comprometidos con el desarrollo de nuevas estrategias de conocimiento y actuación dentro del planeamiento ambiental la presente obra de Alberto Magnaghi puede ser considerada un auténtico hito dentro del proceso de evolución de esta disciplina. Esta apreciación no es una presunción apresurada sino que se basa en la constatación de que estamos ante un cambio epistémico fundamental dentro del proceso de evolución de la disciplina tras superar los reduccionismos propios de las visiones funcionalistas y biocéntricas sobre el entorno. Nos encontramos ahora frente a un cambio cualitativo fundamental se trata del paso de una visión externa de tipo interproposicional de los elementos y de las características del entorno desde un enfoque biocéntrico a una visión antropobiocéntrica o territorialista de tipo intraposicional entre los elementos de un nuevo tipo de entorno: el entorno del hombre con la intención de interpretar las relaciones más profundas y significativas entre estos elementos. De una manera dinámica e incesante pretendemos progresar lentamente pas a pas en los conocimientos básicos de la materia que se imparte en el primer curso con un sistema progresivo de teoría, problemas y ejercicios propuestos. También queremos ser un instrumento valioso para todos aquellos alumnos que hayan olvidado o que no han assolido por vía del camino curricular que han escollido los conocimientos conceptuales básicos para comprender y seguir el curso que inicien.

Quienes hablan son arquitectos principalmente

arquitectos proyectistas pero también arquitectos dedicados a la enseñanza universitaria y a la reflexión histórica y teórica de la arquitectura. Toman la palabra arquitectos que vivieron el triunfo de la Revolución en 1959 ya en pleno ejercicio profesional, otros que se formaron en los años 60 y más adelante y finalmente otros a los que a la hora de cerrar la redacción del presente volumen en 2018 se les podía calificar de arquitectos jóvenes por su edad y por buscar abrir nuevos caminos.

Auxiliares Administrativos. Universidad de Alicante. Temario Volumen I.e-book. ,2004-11-05 Management of Water Resources in Protected Areas Hermes Farfán González, José Luis Corvea Porras, Irene de Bustamente Gutiérrez, James W. LaMoreaux, 2013-03-14 Natural ecosystems are heavily dependent on water as it is essential to the development of life. The ecology and landscape play an important role in the quality and availability of water. It is no coincidence that exceptional hydrological phenomena are found in protected areas. Such is the case with, for example, the geothermic occurrences principally geysers in America's Yellowstone National Park, the oldest park in the world. The Ramsar wetlands, where the ecosystem's dependency on water is strongly evident. The Iguazu Falls on the border of Argentina and Brazil or the Zapata Swamp, the largest of its kind on the Caribbean island of Cuba, further exemplify this point. However, in many cases, the conservation strategies for hydraulic resources in protected areas are ignored or simply deprived of the attention they require. There are many types of suitable management strategies for planning and protecting our valuable treasures. Hydraulic resource management in protected areas is something that must not be separated from these conservation measures. The first Symposium for the Management of Hydraulic Resources in Protected Areas was intended to be a framework of communication about experiences with water resource management in protected areas. Advances in research and possible solutions to the problems within these areas were discussed. The contributions in this proceedings volume are grouped under seven main themes: Purification and reuse of wastewater in rural communities; Impact of public use on water resources; Vulnerability and risks associated with aquifers; Design and management water resources in protected areas; Research and monitoring of water resources in protected areas; Water and its importance as a source of renewable energy in protected spaces; and Geodiversity and conservation of areas with hydraulic heritage.

La cooperación al desarrollo y las universidades valencianas 2000-2005 Isidro Antuñano Maruri, Ximo Revert Roldán, 2006 El Patronat Sud Nord FGUV y la Universitat de València presentamos al lector una iniciativa que surgió de la estrecha colaboración que las universidades valencianas venimos manteniendo en materia de cooperación al desarrollo: proyectos de cooperación conjuntos, programas de formación como el Curso de postgrado de Cooperación, proyectos de sensibilización como el I Congreso Internacional de Cooperación al Desarrollo, así como la reciente constitución del Comité Universitario Valenciano de Relaciones Internacionales y Cooperación CUVRIC. En todo este trayecto se ha hecho necesario mostrar de manera conjunta y articulada qué están haciendo las universidades valencianas como agentes activos de la cooperación al desarrollo, cómo están organizando sus prioridades y sus políticas universitarias de cooperación con qué recursos humanos y presupuestarios cuentan, cómo y de qué manera se integran

en el sistema general de la ayuda oficial al desarrollo cual es la especificidad de su acción universitaria en el conjunto de iniciativas de cooperación como se relacionan con otros agentes sociales e institucionales etc Estas páginas contienen una primera aproximación a las estructuras funciones y programas de actuación de la cooperación en cada universidad valenciana durante los últimos cinco años Se trata sin duda de un período fecundo donde las universidades se han posicionado decididamente en el panorama valenciano canalizando una parte importante de su capital humano y científico al servicio de la cooperación al desarrollo Aquí se muestran algunos hechos algunos resultados
