Literature, Electricity and Politics 1740-1840 Mary Fairclough,2017-03-27 This book investigates the science of electricity in the long eighteenth century and its textual life in literary and political writings Electricity was celebrated as a symbol of enlightened progress but its operation and its utility were unsettlingly obscure As a result debates about the nature of electricity dovetailed with discussions of the relation between body and soul the nature of sexual attraction the properties of revolutionary communication and the mysteries of vitality This study explores the complex textual manifestations of electricity between 1740 and 1840 in which commentators describe it both as a material force and as a purely figurative one The book analyses attempts by both elite and popular practitioners of electricity to elucidate the mysteries of electricity and traces the figurative uses of electrical language in the works of writers including Mary Robinson Edmund Burke Erasmus Darwin John Thelwall Mary Shelley and Richard Carlile **Economic & Clean Energy Benefits of Establishing a Competitive Wholesale Electricity Market in the Southeast United States** Christopher T M Clack,Aditya Choukulkar,Brianna Cote,Sarah A McKee,2020-08-15 Vibrant Clean Energy VCE partnered with Energy Innovations to study the potential impact of a regional transmission organization RTO for the Southeastern United States SE RTO The modeling using WIS dom P found that with an RTO the region could save 384 billion by 2040 create 285 000 full time jobs reduce emissions by 37% and provide transparency in the region The team modeled four scenarios Importantly the first scenario mimicked the utilities integrated resource plans IRPs and found that an increase in thermal generation exceeded requirements and inflated costs Conversely the SE RTO scenario reduced the dependency on thermal generation and shifted to low cost variable generation One of the sensitivity scenarios studied an alternative IRP which allowed for competitive build out and economic dispatch This scenario produced approximately 60% of the savings of the SE RTO Finally a fourth scenario

determined the benefit of an SE RTO when nuclear power plants remained online through 2040 This scenario was very slightly more expensive than the SE RTO scenario but had far fewer emissions Interestingly wind power in the modeling became an important contribution to the electricity mix With it increasingly providing capacity requirements for winter demand profiles Further the modeling found that distributed energy resources DERs and their co optimization provided 10% of the system savings

The Black Speculative Arts Movement Reynaldo Anderson, Clinton R. Fluker, 2019-11-13 The Black Speculative Arts Movement Black Futurity Art Design is a 21st century statement on the intersection of the future of African people with art culture technology and politics This collection enters the global debate on the emerging field of Afrofuturism studies with an international array of scholars and artists contributing to the discussion of Black futurity in the 21st century The contributors analyze and respond to the invisibility or mischaracterization of Black people in the popular imagination in science fiction and in philosophies of history

Popular Magazines and Fiction in Shanghai, 1914-1925 Peijie Mao, 2021-12-02 This book explores the rise of Shanghai based popular magazines produced by the Mandarin Ducks and Butterflies School in early twentieth century China It examines the national gender family and social imaginaries constructed and negotiated through a complex network of relationships between popular writers magazine editors and their intended readers which were represented in various forms of popular narratives including patriotic stories war military stories family narratives domestic fiction utopian writings and industrial business stories The author argues that the national imagination social ideals and the notions of ideal womanhood and the new family were intrinsically linked and integral to the search for cultural identity of the emerging Chinese middle society and an expression of their collective sensibilities experiences and aspirations This book suggests that the cultural imaginaries configured in these magazine stories articulated a shared quest for modernity one that emphasized sentiment quotidian experience the pursuit of the modern family and individual success strengthening of the nation and the reinvention of cultural tradition Popular magazines and fiction therefore became uniquely instrumental in catalyzing the process of Chinese modernity which emerged and developed along the symbiotic interrelations between the private and the public the traditional and the modern and the real and the imaginary

Electrical World, 1886 **Electric Bells and All About Them: A Practical Book for Practical Men** Selimo Romeo Bottone, 2022-08-10 So rapidly has the use of electric bells and similar signaling appliances extended in modern houses offices hotels lifts and ships that every bell fitter must have felt the need of accurate knowledge of the manner in which these instruments act and are made In the following pages the author has attempted to supply this need by giving full details as to the construction of batteries bells pushes detectors etc the mode of wiring testing connecting up localizing faults and in point of fact by directing careful attention to every case that can present itself to the electric bell fitter

The Electrical World, 1885

Power Lines Jennifer L. Lieberman, 2017-07-14 How electricity became a metaphor for modernity in the United States inspiring authors from Mark Twain to Ralph Ellison At the turn of the twentieth century electricity emerged as a metaphor for modernity Writers from Mark Twain to Ralph Ellison grappled with the idea of electricity as both life force illumination and death spark electrocution The idea that electrification created exclusively modern experiences took hold of Americans imaginations whether they welcomed or feared its adoption In *Power Lines* Jennifer Lieberman examines the apparently incompatible notions of electricity that coexisted in the American imagination tracing how electricity became a common though multifarious symbol for modern life Lieberman examines a series of moments of technical change when electricity accrued new social meanings plotting both power lines and the power of narrative lines in American life and literature While discussing the social construction of electrical systems she offers a new interpretation of Twain's use of electricity as an organizing metaphor in *A Connecticut Yankee in King Arthur's Court* describes the rhetoric surrounding the invention of electric execution analyzes Charlotte Perkins Gilman's call for human connection in her utopian writing and in her little known *Human Work* considers the theme of electrical interconnection in Jack London's work and shows how Ralph Ellison and Louis Mumford continued the literary tradition of electrical metaphor Electrical power was a distinctive concept in American literary cultural and technological histories For this reason narratives about electricity were particularly evocative Bridging the realistic and the romantic the historical and the fantastic these stories guide us to ask new questions about our enduring fascination with electricity and all it came to represent

Popular Ghosts Esther Peeren, Maria del Pilar Blanco, 2010-04-01 Haunting has long been a compelling element in popular culture and has become an influential category in academic engagements with politics economics and aesthetics While recent scholarship has used psychoanalysis and the Gothic as frameworks with which to study haunting this volume seeks to situate ghosts in the cultural imagination The chapters in *Popular Ghosts* are united by the impulse to theorize the cultural work that ghosts do within the trans historical contexts that comprise our understanding of everyday life These authors study the theoretical and aesthetic genealogies of the spectral while also commenting on the multiple everyday spaces that this category occupies Rather than looking to a single tradition or medium the essays in *Popular Ghosts* explore film novels photography television music social practices and political structures from different cultures to reopen the questions that surround our haunted sense of the everyday

Artificial Intelligence Enabled Computational Methods for Smart Grid Forecast and Dispatch Yuanyang Li, Yong Zhao, Lei Wu, Zhigang Zeng, 2023-05-05 With the increasing penetration of renewable energy and distributed energy resources smart grid is facing great challenges which could be divided into two categories On the one hand the endogenous uncertainties of renewable energy and electricity load lead to great difficulties in smart grid forecast On the other hand massive electric devices as well as their complex constraint relationships bring about significant difficulties in smart grid dispatch Owing to the rapid development of artificial intelligence in recent years several artificial intelligence enabled computational methods have

been successfully applied in the smart grid and achieved good performances Therefore this book is concerned with the research on the key issues of artificial intelligence enabled computational methods for smart grid forecast and dispatch which consist of three main parts 1 Introduction for smart grid forecast and dispatch in inclusion of reviewing previous contribution of various research methods as well as their drawbacks to analyze characteristics of smart grid forecast and dispatch 2 Artificial intelligence enabled computational methods for smart grid forecast problems which are devoted to present the recent approaches of deep learning and machine learning as well as their successful applications in smart grid forecast 3 Artificial intelligence enabled computational methods for smart grid dispatch problems consisting of edge cutting intelligent decision making approaches which help determine the optimal solution of smart grid dispatch The book is useful for university researchers engineers and graduate students in electrical engineering and computer science who wish to learn the core principles methods algorithms and applications of artificial intelligence enabled computational methods
