Integrating Literature in the Content Areas Sharon Kane, 2017-05-12. This practical, accessible resource will help future and practicing teachers integrate literature into their middle school or high school classrooms while also addressing content area standards and improving the literacy skills of their students. Two introductory chapters are followed by five chapters that each cover a different genre: Chapter 3 Informational Books, Chapter 4 Fiction, Chapter 5 Biography, Autobiography, and Memoir, Chapter 6 Poetry, and Chapter 7 How to and Hands-on Books. Each genre chapter consists of four parts: Part 1 Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills; Part 2 Offers hands-on instructional strategies and activities using literature with activities for use in a variety of disciplines; Part 3 Presents individual author studies, three or four per chapter, with bibliographies and guidelines for using the authors' books in content area courses; Part 4 Features an annotated bibliography of specially selected children and young adult literature for that genre, organized by content area. The annotations provide information about the book which can be used to prepare booktalks and teaching ideas for using in a specific content area. Altogether, these sections contain more than 600 annotated entries, tabbed by subject area, including art, English language arts, languages and culture, math, and technology, music, PE, health, science, and social studies, history.

Gotcha! Kathleen A. Baxter, Marcia Agness Kochel, 1999-12-15. Thousands of children's books are published each year; some are outstanding, while others are not. This book makes it easier for you to find the best in children's nonfiction books, and it offers concrete, classroom-tested ideas for presenting them to students in irresistible ways. Booktalks for more than 350 nonfiction titles appropriate for elementary and middle school students are organized according to topics popular with young readers: Great Disasters, Unsolved Mysteries, Fascinating People, Science, and Fun Experiments to Do. In addition, there are tips on booktalking, an outline for a booktalk program, and a bibliography that can be used for collection development. Appropriate grade levels for each book are cited. Library Media Specialists will find this guide essential. The thematic approach helps teachers search for titles that correlate to curriculum areas or specific units of study. Parents can use the book with their children as a reading selection tool. Anyone who works with young children will find this book an invaluable resource.

Project Zero Frameworks for Early Childhood Education: Project Spectrum : early learning activities Howard

Gardner, David Henry Feldman, Mara Krechevsky, Jie-Qi Chen, 1998-11-13 The groundbreaking work of Harvard University psychologist Howard Gardner on multiple intelligences and Tufts University psychologist David Henry Feldman on nonuniversal development is fast becoming the standard by which children's intelligence and cognitive development is understood In this landmark three volume set Mara Krechevsky and her colleagues at Project Zero make these insights available for both teachers and scholars alike This curriculum resource provides enriching activities in a wide variety of disciplines including mechanics and construction movement and music *Hands-On Science and Technology for Ontario, Grade 2* Jennifer E.
