Electronic Information Systems In Scitech Libraries:

Electronic Information Systems in Sci-Tech Libraries Cynthia A. Steinke, 2019-12-06 This book first published in 1990 analyses the variety of ways in which libraries extend their resources to users beyond the physical walls of their organization Librarians discuss the concept of the library as more than just a place since its holdings can now appear on the screen of users computers in the same city or in a city hundreds of miles away but rather as a force that electronically links users directly with both local and remote sources of information Six informative chapters examine electronic information systems and document delivery from the local collection to the workplace between system libraries and from non library sources Readers can look first hand at some of the most sophisticated and widespread systems in the country including four academic libraries that promote electronic services to remote users and two special libraries offering innovative services The authoritative contributing authors also forecast new systems and services Electronic information systems in sci-tech libraries ,1990

Electronic Expectations Tony Stankus,2000-04-18 Explore the future of Internet based Science Journals Electronic Expectations Science Journals on the Web chronicles the convergence of financial technical and public policy considerations that turned what seemed like science fiction twenty years ago into a library fact of life today The book shows that while electronic publication greatly speeds issuance of important scientific results of enduring value it also has the potential to lower the economic threshold at which crank papers and marginal publications can gain a wide if sadly misled audience in the short run In Electronic Expectations editor Tony Stankus predicts with splendid irony that the electronic journals that will matter the most to genuine scientific progress will be the web versions of long standing leaders among traditional print journals whose electronic typesetting requirements gave the web its first format conventions and rules for safe content transmission Electronic Expectations will empower you to assess the existing print journal system and its prospects for improvement through electronic publishing discern the competing motivations and strategies of science researchers librarians publishers and journal aggregators in going electronic identify the web winners and losers after these first ten years understand the underlying business and technological warfare affecting the larger future of the internet Electronic Expectations demonstrates that while scientists invented the web they no longer control it and that even the very largest research organizations libraries publishers and journal aggregators will to a substantial degree be at the technological and economic mercy of commercial users of the web
