Electronic Superhighway The Shape Of Technology And Law To Come:

LAW OF COPYRIGHT, SECOND EDITION DAS, JATINDRA KUMAR, 2021-02-01 The book attempts to critically analyse the cases on the law of copyright as well as statutory provisions of law of copyright When the first edition of the book was published in 2015 there was no readable and dependable book for the general reader interested to be acquainted with the changing features of the law of copyright immediate after the enactment of the Copyright Amendment Act 2012 Since the publication of this book the Finance Act 2017 has introduced Appellate Board in place of Copyright Board as well as the Supreme Court and High Courts in India have also delivered a large number of judicial decisions on the law of copyright In this edition the author has surveyed all such Courts decisions and analysed them and inserted them in appropriate places of the book and also examined the impact of the Appellate Board It presents not only the provisions of the Copyright Act 1957 in the form of a normative but points out the changes made thereon by formal amendments as well as conflicts of law which have been settled by judicial interpretations The book is divided into ten chapters Chapter 1 is introductory while Chapters 2 and 3 discuss the origin and development of law of copyright at international as well as national level The most important debatable issue in copyright law is works in which copyright subsists and the Chapter 4 is devoted to this aspect Chapter 5 explores various issues relating to author of work owner of copyright and recognised rights of copyright owner The terms of copyright licensing of copyright international copyright and registration of copyright are the subject matter of Chapter 6 while rights of broadcasting organisation and of performers neighbouring rights are the subject matter of Chapter 7 Internet is the greatest communication medium of the contemporary era and there is an inherent link between law of copyright and internet Therefore Chapter 8 is devoted to discuss various issues relating to protection of copyright in internet While Chapter 9 demonstrates the law relating to infringement of copyright and defences of copyright liability Chapter 10 the concluding chapter discusses the enforcement of copyright in India in detail Though the book is designed for the undergraduate and postgraduate students of Law it will be equally beneficial for the researchers academicians jurists lawyers judges as well as members of civil society **TARGET AUDIENCE** Undergraduate and postgraduate students of Law Researchers Academicians Jurists Lawyers Judges as well as members of Civil Society *Copyright and Multimedia Products* Irini A.

Stamatoudi, 2001-11-08 Multimedia products have experienced tremendous market success Yet too often they are given inadequate protection under existing national and international copyright schemes Irini Stamatoudi provides a comprehensive comparative treatment of multimedia works and copyright protection in this clear and concise volume A detailed introduction outlines the nature of the multimedia work as well as the scope of existing legislation separate chapters consider collections and compilations databases audiovisual works and computer programs video games are here treated as a test case Stamatoudi then analyses issues of qualification regime of protection and offers a model for a European legislative solution Copyright and Multimedia Products will interest academics and students as well as practitioners and copyright

policy makers **Reinventing Data Protection?** Serge Gutwirth, Yves Poullet, Paul de Hert, Cécile de Terwangne, Sjaak Nouwt, 2009-05-24 Furthermore the European Union established clear basic principles for the collection storage and use of personal data by governments businesses and other organizations or individuals in Directive 95/46 EC and Directive 2002/58 EC on Privacy and Electronic communications Nonetheless the twenty first century citizen utilizing the full potential of what ICT technology has to offer seems to develop a digital persona that becomes increasingly part of his individual social identity From this perspective control over personal information is control over an aspect of the identity one projects in the world The right to privacy is the freedom from unreasonable constraints on one's own identity Transaction data both traffic and location data deserve our particular attention As we make phone calls send e-mails or SMS messages data trails are generated within public networks that we use for these communications While traffic data are necessary for the provision of communication services they are also very sensitive data They can give a complete picture of a person's contacts habits interests activities and whereabouts Location data especially if very precise can be used for the provision of services such as route guidance location of stolen or missing property tourist information etc In case of emergency they can be helpful in dispatching assistance and rescue teams to the location of a person in distress However processing location data in mobile communication networks also creates the possibility of permanent surveillance **The EDI Law Review**, 1997

Copyright Law in the Digital Society Tanya Aplin, 2005-08-30 Multimedia technology is a key component of the Digital Society This book comprehensively examines the extent to which copyright and database right protect multimedia works It does so from the perspective of UK law but with due attention being paid to EU law international treaties and comparative developments in other jurisdictions such as Australia and the U S The central argument of the book is that the copyright and database right regimes are for the most part flexible enough to meet the challenges presented by multimedia As a result it is neither necessary nor desirable to introduce separate copyright protection or sui generis protection for multimedia works This important and original new work will be essential reading for any lawyer engaged in advising on IP matters relating to the new media industries and scholars and students working in intellectual property and computer law **The Ethics of Cyberspace** Cees J Hamelink, 2000 In this book Cees J Hamelink proposes an answer to how should democratic societies organize cyberspace that puts human rights rather than profit at the top of the agenda He argues that conventional ethical approaches are all seriously flawed There is a growing volume of moral rules netiquettes and codes of conduct but they are of little help in solving the moral dilemmas raised by the new technologies In this book the author analyzes the inadequacies of current global governance policies and structures that underpin them and argues for standards which put justice human security and freedom first **The Computerised Lawyer** Philip Leith, Amanda Hoey, 2012-12-06 The Computerised Lawyer provides a comprehensive introduction to the technology and application of computers in law Over the last 5 years it has become increasingly recognised that the skills associated with new technology are so important that proficiency in the field

is now being viewed as an integral element in the education and skills development of all law students New curriculums are being developed which incorporate the issues discussed in this book and professionals will find the text useful and highly relevant This book fulfils the need for a textbook which whilst assuming no prior knowledge of computing manages to cover all the key issues associated with information technology and its relevance to legal issues and practice Philip Leith and Amanda Hoey have completely rewritten the first edition of this book to bring the reader an up to date text that will be important to everyone working with computers in law

Research Handbook on Governance of the Internet Ian Brown, 2013-01-01 The Internet is now a key part of everyday life across the developed world and growing rapidly across developing countries This Handbook provides a comprehensive overview of the latest research on Internet governance written by the leading scholars in the field With an international focus it features contributions from lawyers economists and political scientists across North America Europe and Australia They adopt a broad multidisciplinary perspective taking in law economics political science international relations and communications studies Thought provoking chapters cover topics such as ICANN the Internet Governance Forum grassroots activism innovation human rights privacy in social networks and network neutrality Being a forward looking guide for the next decade this Research Handbook will strongly appeal to scholars and graduate students in the social sciences studying and researching Internet governance political scientists economists lawyers and computer scientists working on governance issues as well as regulators and policymakers responsible for Internet governance in national governments and intergovernmental organisations

The Electronic Superhighway Ejan Mackaay, Daniel Poulin, Pierre Trudel, Guy Basque, 1995-01-01 The electronic superhighway is a world wide information and communications structure gradually emerging as the direct descendant of telephone cablevision and the Internet Precisely what form the structure will take is not yet clear Henry H Perritt Jr sees the national information structure emerging from the convergence of five cultures and three conceptual models Each of the five cultures has its own traditions and outlook The first is that of broadcasters entertainment producers and cable carriers the second is the telephone companies the third the world of text publishers librarians government information enterprises the fourth is Internet users and the fifth computer hardware and software producers All will contribute to the emerging communications structure A moment's reflection makes one realise how different in outlook they are be it on regulated vs unregulated markets on innovation and its rewards on universal service at affordable prices vs letting the chips fall where they may on interoperability of the products and services of different providers The emergence of the electronic superhighway will force the convergence adaptation or even disappearance of cultures that have hitherto been able to develop in their separate ways It will entail a debate on the society we want to live in The papers in this volume capture the flavor of this debate in midstream

Behaving Badly Judith Rowbotham, Kim Stevenson, 2017-03-02 Both the Victorian age and the late twentieth century are often characterised by contemporaries as times of apparent economic affluence and stability They are often

depicted as periods that shared a conviction that the stability of society including its affluence was threatened by the activities of social deviants These essays aim to examine crime of a socially visible nature in the context of social panic and moral outrage in both the Victorian period and the late twentieth century Through a series of interconnected case studies exploring the social and legal responses to such offences and their public presentation through popular reporting and the court system a series of apparent continuities as well as discontinuities are highlighted in the making of legislation The innovative approach taken by the editors and contributors to concepts of crime and bad behaviour make this essential reading for academics and practitioners The interdisciplinary focus of the book allows it to locate the legal processes and system firmly within the socio cultural context instead of examining it as a discrete area of individual study making this text central to work in law criminology and social policy and history

E-commerce Law and Practice in Europe Ian

Walden, Julia Hörnle, 2001-04-27 With the massive explosion of e commerce and especially the use of the Internet as a transnational and instant medium for business transactions has come a whole range of new laws and regulations and inevitably a minefield of accompanying uncertainties and potential pitfalls So what exactly are the legal issues companies need to address and what are their implications in real terms for the business world Find the answers in this groundbreaking study undertaken for the European Commission within the framework of the ECLIP project With a brief to provide practical help for businesses and e commerce initiatives this series of cutting edge reviews examines and evaluates the special rules designed to regulate the Internet both at a European and at national level in the Member States It also explains the relevant technological developments and evaluates them against the legal background This is an essential guide for legal and corporate practitioners alike as well as software developers and the consultancy community internationally A publication of the ECLIP network *Information Technology and the Law*, 1997 The Internet (II), 2001 Each bibliography includes a comprehensive list of the theorist s works and critical studies of these works in English Each bibliography contains approximately 600 to 900 entries Books journal articles essays within edited books in the manner of Essay and General Literature and dissertations are included References are provided from a wide variety of disciplines and bibliographic sources The primary purpose of each bibliography is to provide access to the widely reprinted primary works in English and the critical literature in a great variety of books and journals The topical bibliographies include the authoritative works on the subject and are arranged in useful categories The lively part of the modern post modern debate is generally taking place in alternative and left journals journals always included in the literature search in the compiling of the bibliographies *The Multimedia and CD-ROM Directory*, 1997 *The Cyberspace is Not a "no Law Land"* Michel Racicot, Canada. Industry Canada, 1997 The Internet revolution poses various challenges in applying enforcing and abiding by existing laws If amendments to existing laws are needed they should only be made in a de minimis way and in a way as technologically neutral as possible under the circumstances Legislators should also be mindful of the need to balance the interests of the

users publishers and disseminators on the one hand and those of the authors on the other while preserving freedom of expression and only imposing limits on such freedom as necessary in a free and democratic society Summary conclusion p 23
