Music 109 Alvin Lucier, 2012-11-16 Composer and performer Alvin Lucier brings clarity to the world of experimental music as he takes the reader through more than a hundred groundbreaking musical works including those of Robert Ashley John Cage Charles Ives Morton Feldman Philip Glass Pauline Oliveros Steve Reich Christian Wolff and La Monte Young Lucier explains in detail how each piece is made unlocking secrets of the composers style and technique The book as a whole charts the progress of American experimental music from the 1950s to the present covering such topics as indeterminacy electronics and minimalism as well

as radical innovations in music for the piano string quartet and opera Clear approachable and lively Music 109 is Lucier's indispensable guide to late 20th century composition No previous musical knowledge is required and all readers are welcome

A short history of electronic music Johann Merrich, 2021-07-20 T00:00:00+02:00 The majority of books covering the birth and development of electroacoustic and electronic music do seem to only give us a partial overview of this peculiar aspect of contemporary cultural production essays and monographs provide an androcentric view on the subject rarely mentioning the contribution of inventresses female composers and theorists The young age of electronic music together with the traditional privilege granted by historians to the productions of North America and some European countries contribute in obstructing the drafting of a paritary diagonal and comprehensive view of this topic This book aims to open a new perspective on electronic music history If we want to write a new more inclusive and equitable future we will have to look at the facts by training a curious gaze stripped of mechanically reiterated certainties From the birth of the Theremin to the first commercial software intended for the production of computer music from Japan to Russia passing through Europe and the American Continent each chapter of this book deals with a specific moment of the history of electronic music narrated through the compositions and experiences of women composers Addressed to lovers of electronic music scholars and non experts A Short History of Electronic Music and its Women Protagonists discloses a new and vibrating universe of untold stories

Experimental Music Michael Nyman, 1999-07-29 Composer Michael Nyman's classic 1974 account of the postwar experimental tradition in music

Audio Culture, Revised Edition Christoph Cox, Daniel Warner, 2017-07-27 The groundbreaking Audio Culture Readings in Modern Music Continuum September 2004 paperback original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concrète free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others

Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography

Rethinking Music through Science and Technology Studies Antoine Hennion, Christophe Levaux, 2021-05-03 This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies STS which propose that facts are neither absolute truths nor completely relative but emerge from an intensely collective process of construction Applied to the study of music this approach enables us to reconcile the human social factual and technological aspects of the musical world and opens the prospect of new areas of inquiry in musicology and sound studies Rethinking Music through Science and Technology Studies draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies considering topics ranging from classical music instrument making to the ethos of DIY in punk music The book s four sections focus on key areas of music study that are impacted by STS organology sound studies music history and epistemology Raising crucial methodological and epistemological questions about the study of music this book will be relevant to scholars studying the interactions between music culture and technology from many disciplinary perspectives

The Value of Events Erik Lundberg, John Armbricht, Tommy D. Andersson, Donald Getz, 2017-05-08 The Value of Events fills an important niche in the literature on events being the first book to comprehensively deal with the subject of value creation and measurement as opposed to impact assessment and programme evaluation Value creation and measurement is often done routinely from specific perspectives such as tourism event management corporate marketing or customer satisfaction However there exist a number of discourses on value and evaluation that have not yet received adequate attention including the justification of governmental intervention and the costs and benefits of hosting major events This edited book written by an international group of academics with expertise in the relevant fields of events tourism sport and culture offers new insight into events and their relationship to sustainability social responsibility cultural and social value Fostering debate in the context of conceptual thinking philosophising multiple stakeholder perspectives and interdisciplinary approaches it challenges the events industry students policy makers and strategists with new perspectives on value with implications for impact forecasting and assessment This is a book for all students pursuing degrees in fields where planned events are important topics while being of great interest to researchers policy makers evaluators and organisers managers of planned events Within a subject in need of further attention The Value of Events offers the most comprehensive overview of event value to date

Ambient Music , **Rationalizing Culture** Georgina Born, 2023-09-01 Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied the social and cultural economy of an institution for research and production of avant garde and computer music She gives a unique portrait of IRCAM s composers computer scientists technicians and secretaries interrogating the effects of the cultural

philosophy of the controversial avant garde composer Pierre Boulez who directed the institute until 1992 Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces and in a volatile political and cultural climate She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures By tracing how IRCAM has tried to accomodate these pressures while preserving its autonomy Born reveals the contradictory effects of institutionalizing an avant garde Contrary to those who see postmodernism representing an accord between high and popular culture Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied
