Implementing e-Navigation John Erik Hagen, 2017-08-31 This one of a kind new resource written by an expert in the field provides a comprehensive introduction to global e navigation This book presents the vision development and objectives of this strategy to increase awareness safety and security in the navigation of commercial shipping Current equipment and practices of maritime navigation are discussed including ship reporting shore based services communications and challenges in vessel travel services VTS and port areas This book identifies performance gaps and demonstrates how to identify user needs as well as solutions through gap analysis E navigation architectures solutions and standards are explored Readers find useful insight into how new concepts of e navigation are being adapted internationally and some of the difficulties that will need to be overcome This resource focuses on the use of e navigation in security cyber security environmental protection communications and global and technical standardization Navigation equipment systems displays bridge systems and other current equipment and practices are explored in this book Readers get a look into the future of e navigation including the impact that digital globalization unmanned ships and big data will have on this strategy

E - Navigation Basics Prof. Capt. Ralph Becker-Heins, 2023-12-28 At first glance there seems to be a fragmented nature of the maritime digital solution market yet after reading this book the big picture becomes clear and everything is put into the right context Over the last decades and after numerous projects committee work and industry initiatives all described in this book the contours of E navigation eventually distilled to a clear structure On one hand the E navigation framework provides reliable guidance but on the other hand leaves sufficient flexibility for further technological and also procedural advancements Realisations of E navigation are in use already being closely linked e.g. with modern integrated ship bridges the layout of information on navigational screens Maritime Single Windows port call optimisation platforms even the entire multi modal transport chain Next to the initiatives in Europe special attention is given to the enormous E navigation project in the Republic of Korea targeted to facilitate the country's transition from a ship building nation to a leader in the maritime digital world The book not only takes an actual summary of the E navigation development but also highlights benefits and opportunities for various stakeholders The target group includes those operating the ships at sea and at port business prime movers formative maritime authorities and researchers
