Electronic Text Investigations In Method And Theory:

Electronic Text Kathryn Sutherland,1997 The contributors examine the impact of electronic technology on literary and textual studies They ask how the computer is being used to reshape ideas of text of authorship of a literary canon of authenticity and value as embodied in the edited work **Text** W. S. Hill,Edward M. Burns,2002-05 The newest volume in the distinguished annual **Text Editing, Print and the Digital World** Kathryn Sutherland,Marilyn Deegan,2016-04-01 Traditional critical editing defined by the paper and print limitations of the book is now considered by many to be inadequate for the expression and interpretation of complex works of literature At the same time digital developments are permitting us to extend the range of text objects we can reproduce and investigate critically not just books but newspapers draft manuscripts and inscriptions on stone Some exponents of the benefits of new information technologies argue that in future all editions should be produced in digital or online form By contrast others point to the fact that print after more than five hundred years of development continues to set the agenda for how we think about text even in its non print forms This important book brings together leading textual critics scholarly editors technical specialists and publishers to discuss whether and how existing paradigms for developing and using critical editions are changing to reflect the increased commitment to and assumed significance of digital tools and methodologies *Research and Advanced Technology for Digital Libraries* Panos Constantopoulos,Ingeborg T. Solvberg,2003-06-30 Digital libraries DLs are major advances in information technology that frequently fall short of expectations 7 28 Covi Kling 7 argue that understanding the wider context of technology use is essential to understanding digital library use and its plementation in different social worlds Recent health informatics research also gues that social and organisational factors can determine the success or failure of healthcare IT developments 8 11 12 Heathfield 11 suggests that this is due to the complex autonomous nature of the medical discipline and the specialized clinician or software engineer approach to system development Negative reactions to these systems is often due to inappropriate system design and poor implementation H ever there may be other less obvious social and political repercussions of information system design and deployment Symon et al 26 have identified within a hospital scenario how social structures and work practices can be disrupted by technology implementation Although these systems often deal with sensitive personal infor tion other system design research has found that apparently innocuous data can be perceived as a threat to social and political stability 1 2 3 To understand the impact of DLs within the medical profession an in depth evaluation is required of the int duction and later development of these applications within their specific social and organisational settings However as Covi Kling 7 have highlighted there are few high level theories that aid designers in understanding the implication of these issues for DL design and implementation **The Nineteenth-Century Press in the Digital Age** J. Mussell,2012-02-07 James Mussell provides an accessible account of the digitization of nineteenth century newspapers and periodicals As studying this material is essential to understand the period he argues that we have no choice

but to engage with the new digital resources that have transformed how we access the print archive [A Handbook to Literary Research](#) Simon Eliot, W. R. Owens, 1998 This unique student resource is specifically designed for those beginning an MA in Literature providing an introduction to research techniques methodologies and information sources relevant to the study of literature at postgraduate level [A Handbook to Literary Research](#) Delia da Sousa Correa, Staff Tutor and Lecturer in Literature W R Owens, W. R. Owens, 2005-08-04 A Handbook to Literary Research is a vital one of a kind student resource which has been written specifically for those embarking on a Masters degree in Literature It provides an introduction to research techniques methodologies and information sources relevant to the study of literature at postgraduate level The unique and invaluable guide is divided into four sections a practical guide to the uses of research libraries research sources and computers including the Internet an introduction to the work of textual scholars and bibliographers focusing particularly on the practical and theoretical issues faced by textual editors an overview of literary research and literary theory including outlines of feminist theory deconstruction reader response and reception theory new historicism and post colonial theory a detailed guide on how to write and present a Masters including a glossary and checklist for finding guides reference books and other study sources **Texts in Multiple Versions** Luigi Giuliani, Herman Brinkman, Geert Lernout, Marita Mathijssen, 2006 Texts in multiple versions constitute the core problem of textual scholarship For texts from antiquity and the medieval period the many versions may be the result of manuscript transmission requiring editors and readers to discriminate between levels of authority in variant readings produced along the chain of copying For texts of all periods and particularly for more modern authors there may also be multiple authorial versions These are of particular importance for genetic criticism as they offer a window on the author's thinking through the developing work The different contexts in which multiple versions may occur different languages different genres different cultures ranging in this collection from ancient Greek texts to novels by Cervantes and Austen dramatic texts from Portugal and Germany poetry from The Netherlands and Lithuania scientific texts from the 19th century provide further layers of complexity The histories of countries are reflected in the histories of editing In Europe this can be seen particularly in the great period of nation building of the 19th century Essays in this volume survey editorial activity in The Netherlands Belgium and Germany in the nineteenth century concluding that nation building and scholarly editing are twinned As a nation searches for its own identity textual scholarship is pressed into service to find and edit the texts on which to establish that identity The two strands of this volume multiple versions of texts editions and national histories testify to the centrality of textual editing to many fields of research There is material here for literary scholars historians and for readers interested in texts from Ancient Greece to modernist classics

Annotated Chaucer bibliography Mark Allen, Stephanie Amsel, 2015-11-01 An extremely thorough expertly compiled and crisply annotated comprehensive bibliography of Chaucer scholarship between 1997 and 2010 **Shakespeare and the Imprints of Performance** J. Gavin Paul, 2014-09-04 Within the study of drama the question of how to relate text and

performance and what interpretive tools are best suited to analyzing them is a longstanding and contentious one. Most scholars agree that reading a printed play is a means of dramatic realization absolutely unlike live performance but everything else beyond this premise is contestable: how much authority to assign to playwrights, the extent to which texts and readings determine performance, and the capability of printed plays to communicate the possibilities of performance. Without denying that printed plays distort and fragment performance practice, this book negotiates an intractable debate by shifting attention to the ways in which these inevitable distortions can nevertheless enrich a reader's awareness of a play's performance potentialities. As author J. Gavin Paul demonstrates, printed plays can be more meaningfully engaged with actual performance than is typically assumed via specific editorial principles and strategies. Focusing on the long history of Shakespearean editing, he develops the concept of the *performancescape*, a textual representation of performance potential that gives relative shape and stability to what is dynamic and multifarious.

Mechanisms Matthew G. Kirschenbaum, 2012-01-06
A new textual studies and archival approach to the investigation of works of new media and electronic literature that applies techniques of computer forensics to conduct media-specific readings of William Gibson's electronic poem *Agrippa*, Michael Joyce's *Afternoon*, and the interactive game *Mystery House*. In *Mechanisms*, Matthew Kirschenbaum examines new media and electronic writing against the textual and technological primitives that govern writing, inscription, and textual transmission in all media: erasure, variability, repeatability, and survivability. *Mechanisms* is the first book in its field to devote significant attention to storage, the hard drive in particular, arguing that understanding the affordances of storage devices is essential to understanding new media. Drawing a distinction between forensic materiality and formal materiality, Kirschenbaum uses applied computer forensics techniques in his study of new media works. Just as the humanities discipline of textual studies examines books as physical objects and traces different variants of texts, computer forensics encourages us to perceive new media in terms of specific versions, platforms, systems, and devices. Kirschenbaum demonstrates these techniques in media-specific readings of three landmark works of new media and electronic literature, all from the formative era of personal computing: the interactive fiction game *Mystery House*, Michael Joyce's *Afternoon*, A Story, and William Gibson's electronic poem *Agrippa*.

The Author's Hand and the Printer's Mind
Roger Chartier, 2013-12-06
In Early Modern Europe, the first readers of a book were not those who bought it. They were the scribes who copied the author's or translator's manuscript, the censors who licensed it, the publisher who decided to put this title in his catalogue, the copy editor who prepared the text for the press, the typesetters who composed the pages of the book, and the proof reader who corrected them. The author's hand cannot be separated from

the printers mind This book is devoted to the process of publication of the works that framed their readers representations of the past or of the world Linking cultural history textual criticism and bibliographical studies dealing with canonical works like Cervantes Don Quixote or Shakespeare s plays as well as lesser known texts Roger Chartier identifies the fundamental discontinuities that transformed the circulation of the written word between the invention of printing and the definition three centuries later of what we call literature

Transferred Illusions Marilyn Deegan, Kathryn Sutherland, 2016-02-24 This is a study of the forms and institutions of print newspapers books scholarly editions publishing libraries as they relate to and are changed by emergent digital forms and institutions In the early 1990s hypertext was briefly hailed as a liberating writing tool for non linear creation Fast forward no more than a decade and we are reading old books from screens It is however the newspaper for around two hundred years print s most powerful mass vehicle whose economy persuasively shapes its electronic remediation through huge digitization initiatives dominated by a handful of centralizing service providers funded and wrapped round by online advertising The error is to assume a culture of total replacement The Internet is just another information space sharing characteristics that have always defined such spaces wonderfully effective and unstable loaded with valuable resources and misinformation that is both good and bad This is why it is important that writers critics publishers and librarians in modern parlance the knowledge providers be critically engaged in shaping and regulating cyberspace and not merely the passive instruments or unreflecting users of the digital tools in our hands

Three Philosophical Poets: Lucretius, Dante, and Goethe, critical edition, Volume 8 George Santayana, 2024-04-09 Santayana's argument for the unity of philosophy and poetry This concise and compelling volume described by Santayana as a piece of literary criticism together with a first broad lesson in the history of philosophy introduces Santayana's thought in the rich context of a European poetic tradition that demonstrates his broad conception of philosophy Rejecting both the Platonic opposition of philosophy and poetry and more recent attempts to reduce philosophy to science Santayana argues that philosophy and poetry at their best are united in articulating a comprehensive vision of the world that permits honest contemplation of the universe He considers the ideal visions of three artists Lucretius's naturalism provides a total perspective on the physical world but renders experience monotonous Dante's supernaturalism provides a total perspective on experience but subordinates nature to morality Goethe's romanticism provides a dramatic perspective on nature and experience but lacks totality Santayana sees each as the best in his own way though none is best in all ways and he speculates that the ideal poet would integrate the gifts and insights of all three resulting in rational art of which philosophical poetry is a prime example This critical edition volume VIII of The Works of George Santayana includes notes textual commentary lists of variants and emendations an index and other tools useful to Santayana scholars
