Roman,2023-09-01 The 1970s were a pivotal decade for the US economy deindustrialization broke the power of the labor unions and made possible the redistribution of income in favor of corporate profits globalization and offshore investments opened alternatives to domestic nonfinancial capital accumulation domestic productivity growth declined and labor saving technology empowered superstar corporations to rapidly gain market share This book argues that the persistent fall in profitability leading to the stagflation crisis was a direct result of the transition from the Fordist phase of capital accumulation based on large scale manufacturing to the neoliberal phase and the rising power of finance Neoliberalism restored the power of rentiers but not the profit rates of nonfinancial corporations Falling accumulation rates weakened the growth capacity of nonfinancial corporate firms and secular stagnation became the norm Neo Keynesian economists Larry Summers and Paul Krugman explained the persistence of secular stagnation with arguments borrowed from Alvin Hansen in the 1930s such as the declining birth rate or the falling relative prices of investment goods hence a shortfall of demand In the Classical paradigm profitability drives capital accumulation and falling profitability slows down growth As the accumulation rate declined and the capacity growth diminished breakdowns in supply links due to the COVID 19 pandemic prevented large infusions of purchasing power to find matching levels of supply hence the stagflation crisis returned The book will be a great asset to researchers and scholars interested in the development of Classical Political Economy concerning issues related to inflation stagnation growing inequality and the next phase of neoliberalism

**Political Economy and Christian Theology Since the Enlightenment** A. Waterman,2004-11-30 Political economy and Christian theology coexisted happily in the intellectual world of the eighteenth century During the nineteenth century they came to be seen as incompatible even mutually hostile In the twentieth century they went their separate ways and are no longer on speaking terms These fourteen essays by Anthony Waterman serve as snapshots of the history of this estrangement and illustrate the gradual replacement of the discourse of theology by that of economics as the rational framework of political debate Others have recently shown that both political economy and Christian theology are important though somewhat neglected elements in modern intellectual history This book is the first to combine these two lines of inquiry

Nell,1979 This collection of essays is designed to illustrate the variety complexity and power of non neoclassical economic thinking The essays define the fundamental questions differently employ different analytical tools and arrive at different conclusions The two strands of non neoclassical thinking that occupy most of the book are the neo Keynesian and the neo Marxian The bulk of the book is composed of essays on microeconomics macroeconomics trade comparative systems and welfare with an unusual section on property rights and social hierarchy
