

NON-SURGICAL PERIODONTAL TREATMENT

Non-surgical periodontal treatment does have its limitations. When it does not achieve periodontal health, surgery may be indicated to restore periodontal health.

SCALING AND ROOT PLANING

Scaling and root planing is a careful cleaning of the root surfaces to remove plaque and calculus from deep periodontal pockets & to smooth the tooth root to remove bacterial toxins. Most periodontists would agree that after scaling and root planing, many patients do not require any further active treatment. However, the majority of patients will require ongoing maintenance therapy to sustain health.

TRAY DELIVERY SYSTEMS

A tray delivery system consists of a custom-fit tray made from impressions of the patient's mouth. Patients use the tray at home to deliver medications that have been prescribed by their dentist.

Elements Of Surgical Treatment In The Delivery Of Periodontal Therapy

Elizabeth A. Pawlak, Philip M. Hoag
