Smart Business Systems for the Optimized Organization Robert J. Thierauf, James J. Hctor, 2002-12-30 One of the first books to probe the latest direction in computing technology Thierauf's and Hctor's innovative text explores ways in which smart business systems can help pick the best most optimal or near optimal solutions from among hundreds even thousands of possibilities that threaten to swamp organizational decision makers daily Authors make clear that while past information systems have focused on generating information that is helpful in the production of knowledge over time smart business systems utilizing optimizing techniques can do it quickly more efficiently and in ways that can raise organizations to higher levels of competitiveness Well illustrated with examples and discussions of typical applications in such areas as strategic planning marketing manufacturing and accounting the book will help managers at all levels tie their organization's critical success factors into its key performance indicators and financial ratios The result is a win win situation within your company's complex of competing
