The second topic presents with several chapters dealing with balance of payments and exchange rates, and again emphasis is placed on the evolution of the various approaches. The third topic focuses on the International Financial Architecture, that is the international institutions such as the IMF, World Bank, and the various groupings of countries such as the G7 and G20 which have been set up to facilitate international trade and economic development. The fourth topic deals with a detailed look at multinational Banking and Global Capital markets, including the role if any of regulation of capital markets and the Banking sector. The fifth topic looks at the strategic developments in international trade and issues of globalisation and international trade law, as well as the use of terms such as strategic trade policy as a way of disguising trade protectionist arguments. The final topic deals in detail with environmental regulations, policy, and property rights and their role in sustainable development. These two volumes are aimed at the following wide spectrum of audiences: from the merely curious to those seeking in depth knowledge: University and College students, Educators, Professional practitioners, Research personnel, and Policy analysts, managers, and decision makers, and NGOs.
