Elephants World Of Nature:

The Secret Elephants Gareth Patterson, 2012-09-28 The elephants of the Knysna forest have long been the subject of mystery and conjecture Over the years they have taken on an almost mythical quality with many doubting whether they existed at all In 1994 the local forestry department maintained that there was only one surviving Knysna elephant the seldom seen female known as The Matriarch The Knysna elephant was thus described as functionally extinct This was the official stance until September 2000 when forest guard Wilfred Oraai encountered and photographed a young bull from a distance of some thirty metres The question arose who was its mother And indeed who was its father In 2001 Gareth Patterson began an independent study of the Knysna elephant For the next seven years he covered thousands of kilometres on foot following ancient elephant paths through the dense Afromontane forest and the surrounding mountain fynbos He found abundant signs to suggest that far from dying out the Knysna elephants are quietly and secretly holding their own Patterson's fieldwork and his dna research in collaboration with conservation geneticist Lori Eggert established that at least five young females exist lending support to Patterson's growing evidence that the Knysna forest and its surroundings are home to a small herd of young elephants The Secret Elephants is the story of these remarkable animals that fought their way back from the brink of extinction without any help from humankind

Darwin Machines and the Nature of Knowledge Henry Plotkin, 1997 Learn and survive Behind this simple equation lies a revolution in the study of knowledge which has left the halls of philosophy for the labs of science This book offers a cogent account of what such a move does to our understanding of the nature of learning rationality and intelligence Bringing together evolutionary biology psychology and philosophy Henry Plotkin presents a new science of knowledge one that traces an unbreakable link between instinct and our ability to know Contrary to the modern liberal idea that knowledge is something derived from experience this science shows us that what we know is what our nature allows us to know what our instincts tell us we must know Since our ability to know our world depends primarily on what we call intelligence intelligence must be understood as an extension of instinct Drawing on contemporary evolutionary theory especially notions of hierarchical structure and universal Darwinism Plotkin tells us that the capacity for knowledge which is what makes us human is deeply rooted in our biology and in a special sense is shared by all living things This leads to a discussion of animal and human intelligence as well as an appraisal of what an instinct based capacity for knowledge might mean to our understanding of language reasoning emotion and culture The result is nothing less than a three dimensional theory of our nature in which all knowledge is adaptation and all adaptation is a specific form of knowledge

Elephantine Truths: Unveiling the Secrets of an Elephant Keeper Pasquale De Marco, 2025-07-12 In Elephantine Truths Unveiling the Secrets of an Elephant Keeper readers are taken on an immersive journey into the captivating world of elephants as seen through the eyes of an experienced and compassionate elephant keeper This book offers a unique blend of personal anecdotes scientific insights and thought provoking reflections on the complex relationship between humans and

Plantation Worlds Maan Barua,2024-07-26 In *Plantation Worlds* Maan Barua interrogates debates on planetary transformations through the histories and ecologies of plantations Drawing on long term research spanning fifteen years Barua presents a unique ethnography attentive to the lives of both people and elephants amid tea plantations in the Indian state of Assam In the nineteenth and early twentieth centuries nearly three million people were brought in to Assam s plantations to work under conditions of indenture Plantations dramatically altered the region s landscape plundered resources and created fraught worlds for elephants and people Their extractive logics and colonial legacies prevail as durations forging the ambit of infrastructures labor habitability and conservation in the present And yet as the perspectives of the Adivasi plantation worker community and lifeworlds of elephants show possibilities for enacting a decolonial imaginary of landscape remain present amid immiseration From the margins of the Global South Barua offers an alternative grammar for articulating environmental change In so doing he prompts a rethinking of multispecies ecologies and how they are structured by colonialism and race *Morning light [afterw.] The New-Church weekly* ,1886 [Ancient Natural History](#)

Roger French,2005-08-08 *Ancient Natural History* surveys the ways in which people in the ancient world thought about nature The writings of Aristotle Theophrastus Strabo Pliny are examined as well as the popular beliefs of their contemporaries Roger French finds that the same natural historical material was used to serve the purposes of both the Greek philosopher and the Christian allegorist or of a taxonomist like Theophrastus and a collector of curiosa like Pliny He argues convincingly that the motives of ancient writers on nature were rarely scientific and indeed that there was not really any science at all in the ancient world This book will make fascinating reading for students academics and anyone who is interested in the history of science or in the ancient history of ideas **The nature park guide for Addo Elephant**

National Park (South Africa) ,2025-09-26 **Elephant Don** Caitlin O'Connell,2015-04-06 O Connell one of the leading experts on elephant communication and social behavior takes us inside the little known world of African male elephants Jane Goodall founder the Jane Goodall Institute UN Messenger of Peace Meet Greg He s a stocky guy with an outsized swagger He s been the intimidating yet sociable don of his posse of friends including Abe Keith Mike Kevin Torn Trunk and Willie But one arid summer the tide begins to shift and the third ranking Kevin starts to get ambitious seeking a higher position within this social club But this is no ordinary tale of gangland betrayal Greg and his entourage are bull elephants in Etosha National Park Namibia where for the last twenty three years Caitlin O Connell has been a keen observer of their complicated friendships Elephant Don tracks Greg and his group of bulls as O Connell tries to understand the vicissitudes of male friendship power struggles and play A frequently heart wrenching portrayal of commitment loyalty and affection between

individuals yearning for companionship it vividly captures an incredible repertoire of elephant behavior and communication Greg O Connell shows is sometimes a tyrant and other times a benevolent dictator as he attempts to hold onto his position at the top Though Elephant Don is Greg s story it is also the story of O Connell and the challenges and triumphs of field research in environs more hospitable to lions and snakes than scientists Readers will be drawn into dramatic tales of an elephant society at once exotic and surprisingly familiar as O Connell s decades of close research reveal extraordinary discoveries about a male society not wholly unlike our own A brilliant study of male elephant society away from the matriarchal herds BBC Wildlife **The Riverside Natural History** John Sterling Kingsley,1888 **The Zak Bates**
