'You Don't Know' Jacob A. E. Nielsen,2025-03-01 People employed at sites of precarious work such as call centres or retail warehouses often live precarious lives Drawing on ethnographic research in a London hostel for precarious workers the book explores the political analytical and practical limitations of using traditional methods of trying to make sense of life in these settings Traditional methods are rooted in practices that emerge from privileged social positions and their enactment is deeply entangled with the processes that create these conditions in the first place This book responds to this by experimenting with precarious methods to enable greater agency to those placed in these precarious situations **An**

**Mathematics** Marie-Pascale Noël, Giannis Karagiannakis, 2022-03-28 Effective Teaching Strategies for Dyscalculia and Learning Difficulties in Mathematics provides an essential bridge between scientific research and practical interventions with children. It unpacks what we know about the possible cognitive causation of mathematical difficulties in order to improve teaching and therefore learning. Each chapter considers a specific domain of children's numerical development: counting and the understanding of numbers; understanding of the base 10 system; arithmetic word problem solving and understanding rational numbers. The accessible guidance includes a literature review on each topic, surveying how each process develops in children, the difficulties encountered at that level by some pupils, and the intervention studies that have been published. It guides the reader step by step through practical guidelines of how to assess these processes and how to build an intervention to help children master them. Illustrated throughout with examples of materials used in the effective interventions described, this essential guide offers deep understanding and effective strategies for developmental and educational psychologists, special educational needs and/or disabilities coordinators, and teachers working with children experiencing mathematical difficulties.

He rouses himself with a sense of purpose and tries to avert his eyes from the reality of her death. Then, when he finds himself facing a regret and despair greater than he can handle, that mysterious man, Jessie, whispers to him: "There is a way. Just one. Meanwhile, Ranta, having left Forgan, is desperately fleeing his former keeper, Takasagi's pursuit. In Thousand Valley, there's no telling when his flight might end.
