**Integrated Electronic Payment Technologies for Smart Cities** Don Graham,2023-08-14 This book addresses the use of existing and emerging electronic payment technologies within a smart city in the context of the clear and proven value these systems have demonstrated in improving transportation It addresses such question as How does the toll gantry work How does it read the transponder tag and deduct the correct amount How do cities harness the transaction data from mass transit to better meet the demand during peak hours What can city planners do to make trip scheduling and payments seamless so commuters can go from park and ride to mass transit to ride share with a single payment platform The volume is technical in nature and describes solid technical solutions to engineers and planners associated with smart cities initiatives It is specifically designed to support smart city designers and engineers as they develop strategies that incorporate the latest payment system technologies It will also be of value to private sector payment systems solution providers looking to deliver their products and services to smart cities In addition the book supplements technical perspectives with guidance on planning and implementation For example it defines procurement approaches for emerging technologies such as crypto currencies and block chain Rounding out technical detail with advice on policy and the organizational framework required to underpin the technologies the book delivers practical support to smart city technical practitioners It further stands as an appropriate text for university courses associated with smart city planning operations and urban analytics This book explores these questions and provides answers that a typical transportation planner can follow It covers technology topics such as RFID Radio Frequency ID ETC Electronic Toll collection and ANPR Automatic Number Plate Recognition The book also delves into how contactless payment Near Field technologies can be used in a smart city Blockchain is introduced as a platform that is suitable for solving the problem of payment segregation and shows how the entities in a smart city can work together to provide a seamless payment solution for riders across different modes of transport The book also covers some theoretical concepts of congestion pricing which students at the university level can apply to city planning projects and research into smart cities Several examples of US based and international smart city implementations are provided in the closing chapters which demonstrate new innovative smart city techniques for the transportation planner EDI and Data Networking in the Public Sector Kim Viborg Andersen,1997-11-30 When researching teaching or working with information

systems in the public sector one is left with few or often no textbooks that provide useful case studies or surveys on the implementation and effects of integrating information technologies in the organizations operations This is surprising since in most first world countries the public sector consumes a substantial part of the gross national product Even more astonishing is the vast amount of financial and organizational resources that are spent developing and implementing various information systems We decided to write this book to provide information for those studying information systems at business schools information and computer departments at colleges universities and for those working hands on with EDI and data networking in public administration Thus our primary target groups for this book are professionals training MA courses computer science MBA MP A and political science EDI has been seen as a means to wire the various policy areas in the public sector Those included are not limited strictly to the public organizations but extend to their trade partners Also government has sought ways to stimulate the usage of ED I in the private sector beyond those transactions involving direct communication with the public sector In this book we have contributors from eight countries and a total of 14 chapters reporting on issues of importance when developing and implementing EDI when government wants to stimulate the diffusion of EDI in society and when organizations want to address the impact of their investments in ED
