Social Justice in Physical Education Daniel B. Robinson, Lynn Randall, 2016-04-25

The physical education classroom can be a site of discomfort for young people who occupy marginalized identities and a place where the normative beliefs and teaching practices of educators can act as a barrier to their inclusion. This timely edited collection challenges pre-service and in-service teachers to examine the pedagogical practices and assumptions that work to exclude students with intersecting and diverse identities from full participation in physical and health education. The contributors to this volume, who consist of both experienced and emerging scholars from Canada, the United States, the United Kingdom, Australia, and New Zealand, approach their topics from a range of social justice perspectives and interpretations. Covering a variety of areas including disability, gender, sexuality, race, social class, and religion, *Social Justice in Physical Education* promotes a broader understanding of the sociocultural, political, and institutional practices and assumptions that underlie current physical education teaching. Each chapter encourages the creation of more culturally relevant and inclusive pedagogy, policy, and practice, and the discussion questions invite readers to engage in critical reflection. Mapping a better way forward for physical and health education, this text will be an invaluable resource for courses on social justice, diversity, inclusive education, and physical education pedagogy.

Primary PE: Unlocking the Potential

Anne Williams, Joanne Cliffe, 2011-05-16 This book aims to address some of the aspects of primary physical education about which there is currently a dearth of high quality texts. It arises from several contextual elements that create a need for something a little different from books currently on offer. Most of these offer guidance on content and teaching skills across the activities of the National Curriculum together with supplementary information about key issues and processes, for example, assessing pupils or including those with special needs. This proposal focuses on learning about primary PE and its potential to contribute not only as a discrete curriculum subject but also across the whole curriculum and to some of the many strategies and initiatives that have been set up to enhance primary practice and achievement. Topics have been selected as the focus for the chapters in this book not only for their current significance within strategies and initiatives but for their potential to contribute to the enhancement of the curriculum in the longer term and particularly in the context of the recommendations of the Rose review and the imminent revisions to the primary national curriculum.

Towards Inclusion of All Learners through Science Teacher Education Michele Koomen, Sami Kahn, Christopher L. Atchison, Tiffany A. Wild, 2018-05-16 *Towards Inclusion of All Learners through Science Teacher Education* serves as an indispensable resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science. This book begins with the voices and stories of the experts: current and former K-12 students with disabilities sharing their experiences in science education classrooms. The voices of students with disabilities are then

connected to the work of leading experts in the area of science education for individuals with disabilities in an effort to address the goals of national reform documents by ensuring rigorous science experiences for all students. It is written in a highly accessible and practical manner making it ideal for all educators including pre-service and in-service teachers, teacher educators, researchers, and curriculum developers. *Attitudes Towards Inclusive Schooling* Susanne Schwab, 2018. Over the last two decades, the implementation of inclusive schooling has increased significantly in European countries and worldwide. According to empirical evidence, one of the most important success factors in implementing inclusive schooling are the attitudes of the actors involved. Previous studies have shown that positive attitudes towards inclusive schooling are not only a condition for success regarding the implementation but also an important outcome variable of inclusive education. The present study provides empirical insights into the attitudes towards students with learning disabilities and behavioral disorders. A study called ATIS STEP Attitudes Towards Inclusive Schooling Students, Teachers and Parents Attitudes was conducted in the school year 2016/17 in 48 inclusive classrooms in Austria. It is the first study to provide longitudinal data that examines the attitudes of the three different stakeholder groups: students, teachers, and parents. Furthermore, the interdependency of the attitudes of the three groups as well as the influence of previous contact experience on the attitudes are analyzed and discussed.
