Lingüística General II. Guía docente Juan Luis Jiménez

Ruiz,2014-05-13 El Espacio Europeo de Educaci n Superior implica una profunda reestructuraci n de la docencia

universitaria que afecta sobre todo al diseño curricular y a las estrategias de aprendizaje. Fruto de estas reformas es Lingüística general II una guía que pretende orientar al alumno en el estudio riguroso del fenómeno llamado lengua. Por ello podrá ser considerada como un proceso de toma de decisiones que se realiza con anterioridad a la práctica del currículum puesto que no se indica solo lo que se pretende sino el por qué y el cómo se piensa conseguir configurando el espacio instructivo en el que se va a poner en práctica. En este sentido no pretende ser solo un manual sino como su nombre indica una guía que oriente al alumno en el aprendizaje de nuestra materia a través de la exposición de contenidos y ejercicios que pueden ser resueltos en la propia guía. Ser por tanto un libro carpeta de trabajo que plasmar al final del semestre el resultado del esfuerzo del alumno por pasar del proceso al producto constituyendo el paradigma tangible de su aprendizaje autónomo.

Ensayo de fonética general; or, Analisis de los sonidos orales aplicables al lenguaje R. Robles, 1900 Ensayo de fonética general R. Robles, 1900 Introducción a la teoría y estructura del lenguaje Luis Alberto Hernando Cuadrado, 1995-01-01. Esta obra ofrece al estudiante universitario y al lector en general una visión sistemática y coherente de los aspectos fundamentales de la lingüística con especial referencia a la lengua española. El libro consta de cinco partes: 1. Nociones generales, 2. Fonética y fonología, 3. Morfología y sintaxis, 4. Semántica, lexicología y lexicografía, 5. Pragmática. En la primera se exponen las cuestiones relativas a la teoría general de los signos semiológicos o semiótica, la lingüística como ciencia, la naturaleza del lenguaje y el signo lingüístico que sirven de marco a las restantes. En la segunda, tras caracterizar la fonética y la fonología, se plantea la distinción de los sonidos y los fonemas, así como de las vocales y las consonantes, y se estudian los grupos vocálicos, los diferentes tipos de rasgos, la neutralización y el archifonema, la correlación, la mutación y la sílaba. En la tercera, delimitado el lugar de la morfología y la sintaxis en la lingüística, se pasa a la consideración del morfema, la palabra, el sintagma, la oración, definiciones, oración y enunciado, oración y proposición, oración y cláusula, oración y frase, las funciones, las categorías y la transposición, y el texto. En la cuarta, se deslinda el objeto de estudio de la semántica, la lexicología y la lexicografía, y se abordan los problemas de la significación, las agrupaciones léxicas, semánticas, el cambio semántico, los elementos constitutivos del léxico y los diccionarios. En la quinta, dedicada a la pragmática, se analizan, regulan el empleo del lenguaje en la comunicación a través de las teorías de los actos de habla, principalmente de los ilocutivos, las implicaturas, la argumentación, la relevancia y la cortesía. Al final de cada una de estas partes se incluye una bibliografía específica.

American Spanish Pronunciation Peter C. Bjorkman, Robert Matthew Hammond, 1989. The scholar editors and eight accomplished colleagues together offer views of phonological research on American Spanish. Spanish Phonology I. R. Macpherson, 1975. **An Introduction to Romance Linguistics, Its Schools and Scholars** Iorgu Iordan, 1970. The Dynamics of Language Use Christopher S. Butler, María de los Ángeles Gómez González, Susana M. Doval-Suárez, 2005-09-22. This book brings together a collection of articles characterized by two main themes: the contrastive study of parallel phenomena in two or more languages and an essentially functional approach in which language is regarded first and

foremost as a rich and complex communication system inextricably embedded in sociocultural and psychological contexts of use. The majority of the studies reported is empirical in nature, many making use of corpora or other textual materials in the language(s) under investigation. The book begins with an introductory section in which the editors provide surveys of the state of the art in both functional and contrastive linguistics. The other five sections of the volume are devoted to: i) a cognitive perspective on form and function; ii) information structure; iii) collocations and formulaic language; iv) language learning and discourse and culture.

Manual of Romance Forensic Linguistics Victoria Guillén-Nieto, Dieter Stein, 2025-06-02

It is evident that published serious science-based work in Forensic Linguistics is predominantly written in English and focuses on casework from the English-speaking world. While the first aspect is understandable given that English serves as an international lingua franca in scientific discourse, the second aspect presents a significant limitation for the field. Should researchers assume that there is simply less crime in non-English speaking areas of the world? A more pertinent question might be: What cultural, disciplinary, legal or legal-cultural factors contribute to the lack of research in and on languages other than English? In addition to addressing the underrepresentation of Romance languages in scientific publications related to forensic work, the chapters in this handbook will also explore the reasons behind this unfortunate situation. Designed to engage readers whether they are linguists, legal professionals or simply interested individuals and to spark interest in Romance Forensic Linguistics, this handbook follows three key objectives. First, we are committed to providing a comprehensive overview of the casework and research conducted in and on several Romance languages including Peninsular Spanish, Catalan, Brazilian Portuguese, French, Canadian French, Italian and Romanian. Second, the chapters in this volume seek to understand why Forensic Linguistics has thrived more in some Romance-speaking countries than in others. Finally, we aim to uncover the reasons for the slower development of Forensic Linguistics in regions where Romance languages are predominantly spoken.
