The text builds a foundation of information about models and disorders and then asks students to apply that information to learning assessment and intervention skills This text takes a functional environmental and conversational approach to assessment and intervention by using the child's natural environment and conversational partners. Unlike other language disorders texts that have a disorder specific focus this text takes a logical traverse from assessment through intervention across disorders. The revised fifth edition is completely updated with current trends and developments in the field and offers an array of practical ideas and useful suggestions for students and speech language pathologists. The text provides concrete guidelines and procedures for the assessment and training of children as well as training for speech language pathologists.
