Sengbush, 2012-12-06 This book is about exploration for oil and gas and focuses particularly on seismic exploration in the hunt for hydrocarbons The first part The Hunt for Hydrocarbons gives general background information with an introductory chapter on the beginnings of the oil business followed by three chapters that include elements of petroleum geology geophysical methods and drilling and logging The second part Seismic Exploration for Hydrocarbons consists of two chapters that describe rudiments of the seismic method and velocity measurements two chapters discussing theory based on wave propagation and the convolutional model and a chapter devoted to each of the three phases of seismic exploration acquisition processing and interpretation I have concentrated on seismic exploration because most of the oil and gas that has been found has been located by this method and it is the only method that has the potential for the increased precision needed in what Halbouty 1982 calls the deliberate search for the subtle trap In contrast to elementary and introductory books that present the seismic method superficially and qualitatively this book develops the method quantitatively using only elementary mathematics algebra and trigonometry so that readers should be able to do things afterwards that they couldn't do before and thereby get a deeper appreciation of the business of hunting for hydrocarbons The book also probes into some sophisticated topics that wouldn't be mentioned IX x use in short courses at a variety of levels Bulletin of the Southwestern Association of Petroleum Geologists American Association of Petroleum Geologists, 1917 List of members in each volume *Petrophysics* Erle C. Donaldson, Djebbar Tiab, 2004-01-24 The petroleum geologist and engineer must have a working knowledge of petrophysics in order to find oil reservoirs devise the best plan for getting it out of the ground then start drilling This book offers the engineer and geologist a manual to accomplish these goals providing much needed calculations and formulas on fluid flow rock properties and many other topics that are encountered every day New updated material covers topics that have emerged in the petrochemical industry since 1997 Contains information and calculations that the engineer or geologist must use in daily activities to find oil and devise a plan to get it out of the ground Filled with problems and solutions perfect for use in undergraduate graduate or professional courses Covers real life problems and cases for the practicing engineer **The South China Sea** Pinxian Wang, Qianyu Li, 2009-05-27 Pinxian Wang and Qianyu

Li The South China Sea SCS Fig 1 1 offers a special attraction for Earth scientists world wide because of its location and its well preserved hemipelagic sediments As the largest one of the marginal seas separating Asia from the Pacific the largest continent from the largest ocean the SCS functions as a focal point in land sea interactions of the Earth system Climatically the SCS is located between the Western Pacific Warm Pool the centre of global heating at the sea level and the Tibetan Plateau the centre of heating at an altitude of 5 000m Geomorphologically the SCS lies to the east of the highest peak on earth Zhumulangma or Everest in the Himalayas 8 848m elevation and to the west of the deepest trench in the ocean Philippine Trench 10 497m water depth Wang P 2004 Biogeographically the SCS belongs to the so called East Indies Triangle where modern marine and terrestrial biodiversity reaches a global maximum Briggs 1999 Among the major marginal sea basins from the west Pacific the SCS presents some of the best conditions for accumulating complete paleoclimatic records in its hemipelagic deposits These records are favorable for high resolution paleoceanographic studies because of high sedimentation rates and good carbonate preservation It may not be merely a coincidence that two cores from the southern SCS were among the first several cores in the world ocean used by AMS ^{14}C dating for high resolution stratigraphy Andree et al 1986 Broecker et al 1988
