Eleven Papers In Analysis American Mathematical Society Translations Series 2 Vol 127:

Eleven papers in analysis P. L. Shabalin, 1986-12-31 This collection of eleven papers covers a broad spectrum of topics in analysis from the study of certain classes of analytic functions to the solvability of singular problems for differential and integral equations to computational schemes for the partial differential equations and singular integral equations

Translations. Ser. 2, 159. Proceedings of the St. Petersburg Mathematical Society. - 2 United States. Office of Naval Research, 1994-11-22 This book contains papers on a wide range of topics including diophantine equations algebraic number theory ring theory theory of functions of a real variable partial differential equations approximation of functions differential geometry computing theory and statistical mechanics The last three papers present historical perspectives on mathematics in St Petersburg *Mathematical Reviews*, 2003

Singularity Theory and Some Problems of Functional Analysis Semen Grigor'evich Gindikin, 1992 The emergence of singularity theory marks the return of mathematics to the study of the simplest analytical objects functions graphs curves surfaces The modern singularity theory for smooth mappings which is currently undergoing intensive developments can be thought of as a crossroad where the most abstract topics such as algebraic and differential geometry and topology complex analysis invariant theory and Lie group theory meet the most applied topics such as dynamical systems mathematical physics geometrical optics mathematical economics and control theory The papers in this volume include reviews of established areas as well as presentations of recent results in singularity theory The authors have paid special attention to examples and discussion of results rather than burying the ideas in formalism notation and technical details The aim is to introduce all mathematicians as well as physicists engineers and other consumers of singularity theory to the world of ideas and methods in this burgeoning area **Second**
