Cultural Moves Herman Gray, 2005-02-14 Herman Gray takes a sweeping look at black popular culture over the past decade to explore culture's role in the push for black political power and social recognition In a series of linked essays he finds that black artists scholars musicians and others have been instrumental in reconfiguring social and cultural life in the United States and he provocatively asks how black culture can now move beyond a preoccupation with inclusion and representation Gray considers how Wynton Marsalis and his creation of a jazz canon at Lincoln Center acted to establish cultural visibility and legitimacy for jazz Other essays address such topics as the work of the controversial artist Kara Walker the relentless struggles for representation on network television when those networks are no longer the primary site of black or any other identity and how black musicians such as Steve Coleman and George Lewis are using new technology to shape and extend black musical traditions and cultural identities

Caldwell, 2003-02-28 The mushroom like growth of new media technologies is radically challenging traditional media outlets The proliferation of technologies like DVDs MP3s and the Internet has freed the public from what we used to understand as mass media In the face of such seismic shifts and ruptures the theoretical and pedagogical foundations of film and TV studies are being shaken to their core New Media demands a necessary rethinking of the field Writing from a range of disciplines and perspectives the scholars here outline new theses and conceptual frameworks capable of engaging the numerous facets of emergent digital technology **Television as Digital Media** James Bennett, Niki Strange, 2011-02-11 Collection of essays that consider television as a digital media form and the aesthetic cultural and industrial changes that this shift has provoked The Craft of Criticism Michael Kackman, Mary Celeste Kearney, 2025-08-19 With contributions from 35 leading media scholars this collection provides a comprehensive overview of the main methodologies of critical media studies Fully revised and updated throughout the chapters in this second edition address various methods of textual analysis as well as reception studies policy studies production studies and contextual multi method approaches like intertextuality and cultural geography Film and television are at the heart of the collection which also addresses digital technologies and new research tools in such areas as software studies gaming and social media Each chapter includes an intellectual history of a particular method or approach a discussion of why and how it was used to study a particular medium or media relevant examples of influential work in the area and an in depth review of a case study drawn from the author s own research Together the chapters in this collection give media scholars and critics a complete toolbox of essential critical media studies methodologies Introduction to Media Production Gorham Kindem, Robert B. Musburger, PhD, 2012-08-21 Introduction to Media Production began years ago as an alternative text that would cover ALL aspects of media production not just film or just tv or just radio Kindem and Musburger needed a book that would show students how every form of media intersects with one another and about how one needs to know the background history of how film affects video and how video affects working in a studio and ultimately how one needs to know how to put it all together Introduction to Media Production is the book that shows this intersection among the many forms of media and how students can use this intersection to begin to develop their own high quality work Introduction to Media Production is a primary source for students of media Its readers learn about various forms of media how to make the best use of them why one would choose one form of media over another and finally about all of the techniques used to create a media project The digital revolution has exploded all the former techniques used in digital media production and this book covers the now

restructured and formalized digital workflows that make all production processes by necessity digital This text will concentrate on offering students and newcomers to the field the means to become aware of the critical importance of understanding the end destination of their production as a part of pre production not the last portion of post production Covering film tv video audio and graphics the fourth edition of Introduction to Digital Media promises to be yet another comprehensive guide for both students of media and newcomers to the media industry

Transmedia Frictions Marsha Kinder, Tara McPherson, 2021-03-16 Editors Marsha Kinder and Tara McPherson present an authoritative collection of essays on the continuing debates over medium specificity and the politics of the digital arts Comparing the term transmedia with transnational they show that the movement beyond specific media or nations does not invalidate those entities but makes us look more closely at the cultural specificity of each combination In two parts the book stages debates across essays creating dialogues that give different narrative accounts of what is historically and ideologically at stake in medium specificity and digital politics Each part includes a substantive introduction by one of the editors Part 1 examines precursors contemporary theorists and artists who are protagonists in this discursive drama focusing on how the transmedia frictions and continuities between old and new forms can be read most productively N Katherine Hayles and Lev Manovich redefine medium specificity Edward Branigan and Yuri Tsivian explore nondigital precursors Steve Anderson and Stephen Mamber assess contemporary archival histories and Grahame Weinbren and Caroline Bassett defend the open ended mobility of newly emergent media In part 2 trios of essays address various ideologies of the digital John Hess and Patricia R Zimmerman Herman Gray and David Wade Crane redraw contours of race space and the margins Eric Gordon Cristina Venegas and John T Caldwell unearth database cities portable homelands and virtual fieldwork and Mark B N Hansen Holly Willis and Rafael Lozano Hemmer and Guillermo G mez Pe a examine

interactive bodies transformed by shock gender and color An invaluable reference work in the field of visual media studies Transmedia Frictions provides sound historical perspective on the social and political aspects of the interactive digital arts demonstrating that they are never neutral or innocent Wired Shut Tarleton Gillespie, 2009-09-18 How the shift toward technical copy protection in the battle over digital copyright depends on changing political and commercial alignments that are profoundly shaping the future of cultural expression in a digital age While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a technical fix instead of specifying what can and cannot be done legally with a copyrighted work this new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In Wired Shut Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry's legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age **Affective Politics of Digital Media** Megan Boler, Elizabeth Davis, 2020-09-02 This interdisciplinary international collection examines how sophisticated digital practices and technologies exploit and capitalize on emotions with particular focus on how social media are used to exacerbate social conflicts surrounding racism misogyny and nationalism Radically expanding the study of media and political communications this book bridges humanities and social sciences to explore affective information economies and how emotions are being weaponized within mediatized political landscapes The chapters cover a wide range of topics how clickbait fake news and right wing actors deploy and weaponize emotion new theoretical directions for understanding affect algorithms and public spheres and how the wedding of big data and behavioral science enables new frontiers of propaganda as seen in the Cambridge Analytica and Facebook scandal The collection includes original interviews with luminary media scholars and journalists The book features contributions from

established and emerging scholars of communications media studies affect theory journalism policy studies gender studies and critical race studies to address questions of concern to scholars journalists and students in these fields and beyond
