transformation and its effects on social change The book also highlights barriers to adoption as well as the potential limitations and failures of this emerging approach Digital social innovation is an emerging discipline that deserves more attention from policy makers and more resources from government Drawing on welfare studies political science sociology psychology law and computer science this book will be of interest to researchers practitioners and policy makers alike

Wohlers, Lynne Louise Bernier, 2015-12-11 The Internet and related technologies have dramatically changed the way we live work socialize and even topple national governments As the Internet becomes increasingly pervasive across societies we find more often that governments adopt Information Communication Technologies ICTs as part of their toolbox for facilitating efficient and citizen oriented service delivery at all levels of government Local governments across the major industrialized democracies have not been an exception to this trend and have set sail into the age of digital government Closest to their citizens towns and cities have adopted ICTs to facilitate electronic government e government While research on local e government functionality in terms of information dissemination service delivery and citizen engagement continues at an impressive empirical and methodological pace gaps in our knowledge remain Cross national comparative research on local e government that covers a wide range of municipalities in combination with in depth case study analyses is lacking Informed by a comparative case study approach this book seeks to narrow that gap and offer practical policy solutions to facilitate local e government We do so by pursuing both a macro and micro perspective of e government functionality in the federal republics of Germany and the United States and unitary France and Japan The macro perspective focuses on the state and scope of e government functionality across a large number of randomly selected municipalities of all sizes in these advanced industrialized countries Based on a small sample of case studies the micro perspective analyzes the successful implementation of e government in Seattle United States Nuremberg Germany Bordeaux France and Shizuoka City Japan
