Wesner, Harry L. Nustad, 1996      **Mathematics in Action** Consortium for Foundation Mathematics, 2003-12 This introductory algebra text based on standards in the AMATYC Crossroads document motivates college math students to develop mathematical literacy and a solid foundation for future study in mathematics and other disciplines This second book of a three book series presents mathematical concepts and skills through relevant activities derived from real life situations these activities are meaningful to students because they illustrate how mathematics arises naturally from real world situations and problems The Mathematics in Action series is based on the assumption that students learn mathematics best by doing mathematics in a meaningful context Students take an active role in their own learning by working in groups thereby developing communication skills a sense of independence and a can do attitude about mathematics Technology is integrated throughout the book so that students learn to interpret real life data numerically symbolically and graphically Regardless of their level of preparation for the course students can use this text to increase their knowledge of mathematics

their problem solving skills and their overall confidence in their ability to learn      **Subject Guide to Books in Print** ,1997

Lockwood,2000      **Elementary and Intermediate Algebra** Donald Hutchison,Barry Bergman,Louis Hoelzle,2004-03 A Unified Text That Serves Your Needs Most colleges offering elementary and intermediate algebra use two different texts one for each course As a result students may be required to purchase two texts this can result in a considerable amount of topic overlap Over the last few years several publishers have issued combined texts that take chapters from two texts and merge them into a single book This has allowed students to purchase a single text but it has done little to reduce the overlap The goal of this author team has been to produce a text that was more than a combined text They wanted to unify the topics and themes of beginning and intermediate algebra in a fluid non repetitive text We also wanted to produce a text that will prepare students from different mathematical backgrounds for college algebra We believe we have accomplished our goals For students entering directly from an arithmetic or pre algebra course this is a text that contains all of the material needed to prepare for college algebra It can be offered in two quarters or in two semesters The new Review Chapter found between chapters 6 and 7 serves as a mid book review for students preparing to take a final exam that covers the first seven chapters Finally we have produced a text that will accommodate those students placing into the second term of a two term sequence Here is where the Review Chapter is most valuable It gives the students an opportunity to check that they have all of the background required to begin in Chapter 7 If the students struggle with any of the material in the Review Chapter they are referred to the appropriate section for further review      *Catalog of Copyright Entries.
