him a humorous but authentic path of hippy spirituality called Shmeiki which is said to be free of the seriousness and self righteousness typical of other similar practices Sheila wishes David to spread the word of Shmeiki but for him to do so effectively he must first clear out his emotional blockages For this reason she sends him on a great walk of more than 2000 km from Goa to Dharamshala insisting he travels without taking money or wearing shoes In accepting this challenge David becomes Shmeiki Baba The Shmospels describe his epic journey from the perspectives of four witnesses It is a cosmic psychedelic and inspiring story about self acceptance love and surrender

A Collection Of Curious Coincidences Kenneth Diehl, 2022-12-14 We live in a divided world Politics nationality customs economic status and more seem to be the stuff of contention and conflict None more so than the zealots that divide our search for and understanding of the truth regarding our existence On the one hand we have the naturalists who believe that the entire universe can be explained by science On the other hand there are the religious who believe that everything has already been explained through faith Many in both camps believe that only their view is correct and the other must be wrong In support of their belief each side has their rationalizations that serve only to satisfy their own egos and comfort members who already support their opinions What if both camps are equally right What if science and faith are reconcilable Wouldn't that be interesting This book is an attempt to illuminate beliefs from both camps that appear quite coincidentally to be saying the same thing It is an effort to illustrate how details of what we learn through physics chemistry history archaeology and other sciences appear to support the broad explanations of what we believe on faith It is offered as an explanation of how if we really stop to think about what we believe we know we may find some common ground between the two extremes of faith and science that can stand the scrutiny of criticism Furthermore it is not an attempt to evangelize or convert It is a collection of topics where both science and faith have a lot to say and to this author's mind appear to be in tremendous agreement Hopefully the discussions herein will prompt greater interest in evaluating our beliefs and encourage the reader to look deeper into their apparent meaning In any case I hope the reader finds the topics as interesting as they are challenging
