Library of Congress Catalogs Library of Congress, 1976 *Library of Congress Catalog* Library of Congress, 1970 A cumulative list of works represented by Library of Congress printed cards *The Visual Problem of High Energy Physics, Gravitation and Cosmology* Leo G. Sapogin, V. A. Dzhanibekov, Yu. A. Ryabov, This article describes a model of Unitary Quantum Field theory where the particle is represented as a wave packet The frequency dispersion equation is chosen so that the packet periodically appears and disappears without form changings The envelope of the process is identified with a conventional wave function Equation of such a field is nonlinear and relativistically invariant With proper adjustments they are reduced to Dirac Schrödinger and Hamilton Jacobi equations A number of new experimental effects have been predicted both for high and low energies Fine structure constant $1/137$ was determined in 1988 masses of numerous elementary particles starting from electron were evaluated in 2007 with accuracy less than 1 % 2 pentaquarks barion Higgs boson and particle 28 GeV were discovered 11 years later all of them were evaluated with high accuracy before *New Scientist*, 1987-03 **Atomic Energy Research in the Life and Physical Sciences**, 1961 [Technical Book Review Index](#), 1972

Irreversible Time Physics Igor Taganov, 2020-03-06 In modern science including theoretical physics as in the early classical mechanics the unnatural reversible time of Newton based on the medieval concept of geometric time by Nicholas Oresme is still used This original sin of natural sciences has unintended consequences and creates a set of paradoxes and methodological problems for science The book explores two new models of essentially irreversible time decelerating cosmological time and irreversible discrete time of a microcosm It discusses recent astronomical observations that reveal evidence of the cosmological deceleration of the pace of time in the distant cosmos in the solar system and on earth The structure of the model of irreversible discrete time of a microcosm as considered in the book allows for the existence of both time and anti time In particular the model predicts new uncertainty relations and violation of the mirror symmetry of the integral internal parity of the entire population of micro particles that correspond to current studies of elementary particle physics [Enrico Fermi](#) Carlo Bernardini, Luisa Bonolis, 2013-11-11 Enrico Fermi's scientific work noted for its originality and breadth has had lasting consequences throughout modern science Written by close colleagues as well as scientists whose fields were profoundly influenced by Fermi the papers collected here constitute a tribute to him and his scientific legacy They were commissioned on the occasion of his 100th birthday by the Italian Physical Society and confirm that Fermi was a rare combination of theorist experimentalist teacher and inspiring colleague The book is organized into three parts three biographical overviews by close colleagues replete with personal insights fourteen analyses of Fermi's impact by specialists in their fields spanning physics chemistry mathematics and engineering and a year by year chronology of Fermi's scientific endeavors Written for a general scientific audience *Enrico Fermi His Work and Legacy* offers a highly readable source on the

life of one of the 20th century's most distinguished scientists and a must for everybody interested in the history of modern science **Whitaker's Five-year Cumulative Book List** ,1968 *British Book News* ,1972 **National Union Catalog** ,1968 **Scientific and Technical Aerospace Reports** ,1995 **Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment, and Natural Resources 2009** Peterson's,2007-11 The six volumes of Peterson's Annual Guides to Graduate Study the only annually updated reference work of its kind provide wide ranging information on the graduate and professional programs offered by accredited colleges and universities in the United States and U S territories and those in Canada Mexico Europe and Africa that are accredited by U S accrediting bodies Books 2 through 6 are divided into sections that contain one or more directories devoted to individual programs in a particular field Book 4 contains more than 3 800 programs of study in 56 disciplines of the physical sciences mathematics agricultural sciences the environment and natural resources **The British National Bibliography** Arthur James Wells,2005 *The National Union Catalogs, 1963- ,1964* **Whitaker's Cumulative Book List** ,1972 **The Tenseless Theory of Time** W.L. Craig,2013-03-09 the present book and its companion volume *The Tensed Theory of Time a T Critical Examination* are an attempt to adjudicate what one recent discussant has called the most fundamental question in the philosophy of time namely whether a static or a dynamic conception of the world is correct I had originally intended to treat this question in the space of a single volume but the study swelled into two I found that an adequate appraisal of these two competing theories of time requires a wide ranging discussion of issues in metaphysics philosophy of language phenomenology philosophy of science philosophy of space and time and even philosophy of religion and that this simply could not be done in one volume If these volumes succeed in making a contribution to the debate it will be precisely because of the synoptic nature of the discussion therein Too often the question of the nature of time has been prematurely answered by some philosopher or physicist simply because he is largely ignorant of relevant discussions outside his chosen field of expertise In these two complementary but independent volumes I have attempted to appraise what I take to be the most important arguments drawn from a variety of fields for and against each theory of time [Time and the Metaphysics of Relativity](#) W.L. Craig,2013-11-11 the present volume is part of a larger project which is the attempt to draft a T coherent doctrine of divine eternity and God's relationship to time In my God I Time and Eternity I argued that whether one construes divine eternity in terms of timelessness or of omnitemporality will depend crucially upon one's views about the objectivity of tensed facts and temporal becoming If one adopts a tensed or in McTaggart's terminology an A Theory of time then a coherent doctrine of divine eternity requires that one construe God at least since the moment of creation to exist temporally which implies that divine timelessness can be successfully maintained only if a tenseless or B Theory of time is correct Accordingly in my companion volumes *The Tensed Theory of Time a Critical Examination* and *The Tenseless Theory of Time a Critical Examination* I set for myself the task of 2 adjudicating the A vs B Theory of time In the former volume I examine arguments for and against the A Theory of time and in

the latter I turn to an examination of arguments for and against the B Theory. This inquiry took me into a study of relativity theory, its presuppositions and implications. The paucity of integrative literature dealing with the concept of God and relativity theory is striking.
