Turner, Robert Turner, 2015-08-05 Excerpt from A Practical Guide to the Breaking and Training of the Young Horse The author of this little work is fully aware that he can claim but little merit on the score of originality as many clever writers on this subject have preceded him but their precepts are for the most part of so elaborate and technical a nature as to render them comparatively useless if not unintelligible to the majority of readers The object of this short treatise is to place within the reach of every one a few plain practical instructions by which the horse may be trained to work with comfort to himself and safety to his rider thereby preventing numerous accidents to both The horse is beyond all contradiction one of the most beautiful as well as valuable animals man has subjugated to his will whether we view him in point of utility or as contributing to our pleasure and this perhaps may in some degree account for the ambition that seems natural to most men to be thought judges of this animal Among Englishmen in particular this feeling seems to pervade every rank from the nobleman with his numerous stud to the meanest helper in his stable Even the mechanic who is rarely loosed from his toil when he does take a holiday usually selects the race time for the occasion and although he may never have crossed a horse still takes an interest

in his performance and delivers his opinion as to the quality of the different animals as boldly as if he were a profound judge About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
