Effective Meetings Improving Group Decision Making:

Effective Meetings John E. Tropman, 1995-11-15 The purpose of this book is to improve the decision making process in social work groups. Illustrating the volume with various meeting models including advisory groups, intergroup and intercultural meetings, John E. Tropman examines a number of critical issues facing social workers including family and community violence, health care and homelessness. New to this Second Edition is a discussion of the relationship between meetings and missions, goals and external and internal forces. *Effective Meetings* John E. Tropman, Bronwyn Mills, 1980-11 This book deals with a topic whose importance is evident to anyone familiar with the human service field where innumerable hours are inevitably spent in meetings. This book's basic premise is that group decision making is valuable and essential in our modern society because it brings together individuals with a variety of different expertise, values and experiences in order to solve complex problems. Tropman presents specific procedures to help participants improve decision making by utilizing the contribution of all group members appropriately and he offers some explicit guidelines and techniques for this purpose. *Social Casework* *Effective Meetings* John E. Tropman, 1996 This book shows that the value of group decision making lies in its ability to bring together people with a variety of different expertise and experiences. These techniques are applied to problems such as health care, homelessness and family violence. *Group Decision Making* Thomas L. Saaty, Kirti Peniwati, 2013-11-15 When a group makes a decision that decision carries a lot more weight than when just one person does it. Think of the founding fathers of the American constitution and how much power and influence their ideas have had in the entire world for more than two hundred years. Also think of gravity, a universal force brought about by an enormous number of minute particles that band together to make a universal law. Together they create a massive force, a law of nature alone they can barely be noticed. That is how our minds work by deciding together to create a power that transcends our individuality. Group decision making is a gift and an opportunity to create greater influence through the working together of many minds. This book shows how to use the Analytic Hierarchy Process for hierarchical decision making and the Analytic Network Process for decision making in networks with dependence and feedback in group decision making. Part I discusses the group and the decision and shows the importance of using a structured process particularly for those high value decisions involving many powerful parties with different interests. It discusses how to facilitate a group decision combine individual judgments and smooth differences to arrive at a decision that everyone can live with and get behind. Part II discusses the group in planning and how to draw out differences. Part III is about conflict resolution and Part IV is about how to address significant issues that come up in group decision making and shows that it is possible to construct an overall group preference. **Leadership** Craig E.
