several related disciplines including psychoneuroimmunology and developmental psychobiology With an overarching biopsychosocial lifespan perspective Turner Cobb examines the effects of early life experience on health outcomes as well as covering the experience of acute and chronic illness during childhood Lots of helpful aids are provided per chapter including key learning objectives textboxes putting spotlights on key pieces of research lists of key concepts to revise useful websites and further reading suggestions With a perspective designed to both inform and to challenge this stimulating textbook will introduce you to the central relevance and many applications of child health psychology It will be of interest to final year undergraduate and postgraduate students in health and clinical psychology as well as to students in health sciences nursing and childhood studies **Handbook of Developmental Social Neuroscience** Michelle de Haan, Megan R.

Gunnar, 2011-06-23 Recent years have seen an explosion of research into the physiological and neural bases of social behavior This state of the science handbook is unique in approaching the topic from a developmental perspective Exploring the dynamic relationship between biology and social behavior from infancy through adolescence leading investigators discuss key processes in typical and atypical development Chapters address emotion motivation person perception interpersonal relationships developmental disorders and psychopathology The volume sheds light on how complex social abilities emerge from basic brain circuits whether there are elements of social behavior that are hard wired in the brain and the impact of early experiences Illustrations include 8 color plates Stress, Trauma, and Children's Memory Development Mark L.

Howe, Gail S. Goodman, Dante Cicchetti, 2008-04-10 Few questions in psychology have generated as much debate as those concerning the impact of childhood trauma on memory A lack of scientific research to constrain theory has helped fuel arguments about whether childhood trauma leads to deficits that result in conditions such as false memory or lost memory and whether neurohormonal changes that are correlated with childhood trauma can be associated with changes in memory Scientists have also struggled with more theoretical concerns such as how to conceptualize and measure distress and other negative emotions in terms of for example discrete emotions physiological response and observer ratings To answer these questions Mark L Howe Gail Goodman and Dante Cicchetti have brought together the most current and innovative neurobiological cognitive clinical and legal research on stress and memory development This research examines the effects of early stressful and traumatic experiences on the development of memory in childhood and elucidates how early trauma is related to other measures of cognitive and clinical functioning in childhood It also goes beyond childhood to both explore the long term impact of stressful and traumatic experiences on the entire course of normal memory development and determine the longevity of trauma memories that are formed early in life Stress Trauma and Children's Memory Development will be a valuable resource for anyone interested in early experience childhood trauma and memory research Children and
