Rethinking the Medieval Legacy for Contemporary Theology Anselm K. Min,2014-10-27 In Rethinking the Medieval Legacy for Contemporary Theology six distinguished theologians bridge medieval and contemporary theologies by developing the theological significance of medieval insights in response to contemporary issues Their nuanced readings of medieval texts extended to major theological issues of our time provide examples of the retrieval of the medieval tradition an essential part of any contemporary theological reconstruction Barbara Newman extends the theology of perichoresis or mutual indwelling to illuminate the relationship between donor and recipient in the case of organ transplants Marilyn McCord Adams applies insights about divine friendship to the perennial issue of horrendous evil and Kevin Madigan brings principles of medieval exegesis to bear on the contemporary historical critical approach to biblical interpretation Ingolf U Dalferth applies insights from the doctrine of divine omnipotence and creation ex nihilo to deconstruct Heidegger's limitation of the possibilities of authentic existence to historical facticity Pim Valkenberg explores the possibilities of a theological encounter between Christianity and Islam in the works of Aquinas and Nicholas of Cusa and Anselm K Min applies the analogical insights of

Aguinas on the nature and limits of human knowledge of God to a critique of contemporary theologies that claim to know either too little or too much about God Darwinian Evolution and Classical Liberalism Stephen C. Dilley, 2013-05-02 Darwinian Evolution and Classical Liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between Darwinian biology and classical liberalism Early chapters focus on classical thinkers like John Locke and Adam Smith while later chapters provide analyses of present day classical liberals focusing especially on F A Hayek Thomas Sowell and Larry Arnhart the most prominent advocates of contemporary classical liberalism Thematically the volume falls into three parts Part I examines foundational matters arguing that Darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy This section also contends that the free market's spontaneous order is fully compatible with a teleological or non Darwinian view of the universe Part II turns to contemporary applications contending that Darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family This section also argues that since its inception Darwinism has attenuated core tenets and values of classical liberalism and Western civilization Part III of the volume contains alternative views to those in the first two parts adding critical diversity to the book Respectively these chapters hold that Darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family God and Reason in the Middle Ages Edward Grant, 2001-07-30 Between 1100 and 1600 the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization Of crucial significance was the invention of the university around 1200 within which reason was institutionalized and where it became a deeply embedded permanent feature of Western thought and culture It is therefore appropriate to speak of an Age of Reason in the Middle Ages and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century The object of this study is twofold to describe how reason was manifested in the curriculum of medieval universities especially in the subjects of logic natural philosophy and theology and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition Christian Apologetics and Philosophy Paul Herrick, 2024-10-01 A highly readable barbarism and unreason introduction to Christian apologetics that joins contemporary analytic philosophy with modern biblical scholarship In this book Paul Herrick presents the basics of classical Christian apologetics in the form of an inference to the best explanation argument that builds from the book s first chapter to its last Drawing on contemporary philosophy logic and biblical scholarship Herrick incorporates thoughts from Socrates Plato Thomas Aguinas and C S Lewis as well as scholars such as William Lane Craig J P Moreland Richard Swinburne and Craig Blomberg to present a multifaceted argument for the

Christian faith With sections on the Socratic method the Christian examination of conscience the Big Bang miracles the historical reliability of the New Testament the resurrection of Christ and more this book promises to be useful intellectually and spiritually for seekers doubters and those already in the faith God and Logic in Islam John Walbridge, 2010-11-15 This book investigates the central role of reason in Islamic intellectual life Despite widespread characterization of Islam as a system of belief based only on revelation John Walbridge argues that rational methods not fundamentalism have characterized Islamic law philosophy and education since the medieval period His research demonstrates that this medieval Islamic rational tradition was opposed by both modernists and fundamentalists resulting in a general collapse of traditional Islamic intellectual life and its replacement by more modern but far shallower forms of thought However the resources of this Islamic scholarly tradition remain an integral part of the Islamic intellectual tradition and will prove vital to its revival The future of Islam Walbridge argues will be marked by a return to rationalism **Nominalism and Constructivism in** Seventeenth-Century Mathematical Philosophy David Sepkoski, 2013-05-24 What was the basis for the adoption of mathematics as the primary mode of discourse for describing natural events by a large segment of the philosophical community in the seventeenth century In answering this question this book demonstrates that a significant group of philosophers shared the belief that there is no necessary correspondence between external reality and objects of human understanding which they held to include the objects of mathematical and linguistic discourse The result is a scholarly reliable but accessible account of the role of mathematics in the works of amongst others Galileo Kepler Descartes Newton Leibniz and Berkeley This impressive volume will benefit scholars interested in the history of philosophy mathematical philosophy and the history of mathematics The Unmaking of the Medieval Christian Cosmos, 1500–1760 W.G.L. Randles, 2016-12-05 From the early Christian era and throughout the Middle Ages theologians exerted considerable effort to achieve a synthesis bringing together Greek cosmology and the Creation story in Genesis In the construction of the medieval Empyrean the dwelling place of the Blessed Aristotle's philosophy proved of critical importance From the Renaissance on largely in revolt against Aristotle humanist Bible critics Protestant reformers and astronomers set themselves to challenge the medieval synthesis Especially effective in the ensuing dismantlement from the 16th to 18th centuries was the pagan concept of an infinite universe resuscitated from Antiquity by the Italian philosophers Bruno and Patrizi Indirectly inspired by the latter the doctrines of the French pre Enlightenment thinkers Descartes and Gassendi spread throughout Latin Catholic Europe in spite of considerable resistance By the middle of the 18th century the Roman ecclesiastical authorities were brought to acknowledge an end to the medieval cosmos allowing Catholics to teach the theory of heliocentrism Term Paper Resource Guide to Medieval History Jean Shepherd Hamm, 2009-11-25 Help students get the most out of studying medieval history with this comprehensive and practical research guide to topics and resources Term Paper Resource Guide to Medieval History brings key historic events and individuals alive to enrich and stimulate students in challenging and
