The 2nd edition of this book is more than just an update with new sections on common factors in therapy and on integrative models of family therapy which are particularly welcome.
Ivan Eisler, Institute of Psychiatry, Kings College London, UK

Carr's style of comprehensively considering different theories and approaches in a practical manner and demonstrating their integrative and cohesive properties is exceptionally helpful and grounding for the reader. There is little doubt that this volume will well serve students, trainees and experienced practitioners for sometime to come.

Object Relations Theory and Practice David E. Scharff, 1996. Object relations theory has caused a fundamental reorientation of psychodynamic thought. In *Object Relations Theory and Practice* Dr David E Scharff acclimates readers to the language and culture of this therapeutic perspective and provides carefully selected excerpts from seminal theorists as well as explanations of their thinking and clinical experience. He offers readers an unparalleled resource for understanding object relations psychotherapy and theory and applying it to the practice of psychotherapy and psychoanalysis. The book's sequence establishes the centrality of relationships in this theory: the internalization of experience with parents, splitting, projective identification, the role of the relationship between mother and young child in development and transference and countertransference in the therapeutic action of psychoanalysis and psychotherapy. This book will introduce students to the basics to the widening scope of object relations theory and to its application to psychoanalysis and individual, group and family psychotherapy.

The Primer of Object Relations Jill Savege Scharff, David E. Scharff, 2005-05-03. The two psychotherapists, both psychiatrists at Georgetown University, expand and update their initial explanation of the British object relations theory to clarify some of the arguments and incorporate developments in the theory and its practice over the past decade. It is a theory of the human personality developed from studying the therapist-patient relationship as it reflects the mother-infant dyad. No date is noted for the first edition. Annotation 2005.
