Snider,2009 This essay offers a proposal for the missing constructs and language with which we can more precisely think about and examine the Army s Professional Military Ethic starting with its macro context which is the profession s culture We examine three major long term influences on that culture and its core ethos thus describing how they evolve over time We contend that in the present era of persistent conflict we are witnessing dynamic changes within these three influences In order to analyze these changes we introduce a more detailed framework which divides the Ethic into its legal and moral components then divide each of these into their institutional and individual manifestations Turning from description to analysis we also examine to what extent if any recent doctrinal adaptations by the Army FM 3 0 3 24 and 6 22 etc indicate true evolution in the essential nature of the profession s Ethic Then we present what we believe to be the most significant ethical challenge facing the Army profession the moral development of Army leaders moving them from values to virtues in order that they as Army professionals can consistently achieve the high quality of moral character necessary to apply effectively and in a trustworthy manner their renowned military technical competencies P x **Routledge Handbook of**

insights for those involved in the design of military strategy and the forces that must execute that strategy Emphasizing the impacts of technology new era strategic competition demography and climate change Mick Ryan uses historical as well as contemporary anecdotes throughout the book to highlight key challenges faced by nations in a new era of great power rivalry Just as previous industrial revolutions have advanced societies the nascent fourth industrial revolution will have a similar impact on how humans fight compete and build military power in the twenty first century After reviewing the principle catalysts of change in the security environment War Transformed seeks to provide a preview of the shape of war and competition in the twenty first century Ryan examines both the shifting character of war and its enduring nature In doing so he proposes important trends in warfare that will shape all aspects of human competition and conflict in the coming decades The remainder of the book analyzes how military institutions must prepare for future competition and conflict Competing and engaging in combat in this new era involves new and evolved strategies and warfighting concepts as well as adapting our current military organizations It will also demand building an intellectual edge in military personnel through evolved concepts of training education and development As the competitive environment and potential battlefields continue to change conceptions of combat competition and conflict must also evolve Mick Ryan makes the case for transforming how Western military institutions view war in this century *Redefining the Modern Military* Nathan K. Finney, Tyrell

Mayfield, 2018-10-15 This edited collection will expand upon and refine the ideas on the role of ethics and the profession in the 21st Century The authors delve into whether Samuel Huntington and Morris Janowitz still ring true in the 21st century whether training and continuing education play a role in defining a profession and if there is a universal code of ethics required for the military as a profession Redefining the Modern Military is unique in how it treats the subject of ethics and the military profession as well as the types of writers it brings on board to address this topic The book puts a significant emphasis on individual agency for military professionalism as opposed to broad organizational or cultural change Such a review of these topics is necessary because the process of serious intellectual self reflection is a requirement especially in a profession that involves life and death of people and nations Career Progression Guide For Airmen: The Basics MARK C.
