Foundations Of Moral Obligation The Stockdale Course:

Foundations of Moral Obligation Joseph Gerard Brennan,1992 **Foundations of Moral Obligation** Joseph Gerard Brennan,1994 Professor Joseph Brennan has a gift for bringing philosophy to life making it a practical tool for evaluating day to day decisions as well as the great issues of our times Morality and ethics have never been more necessary than in our brave new world order of downsizing intolerance corruption sexism racism and all other isms About the Stockdale Course Shot down over North Vietnam U S Navy pilot James Stockdale spent seven and a half years as a prisoner of the communists Although he was systematically tortured and brainwashed Stockdale resisted his captors led and sustained his fellow prisoners and remained loyal to the principles he had joined the navy to defend That incredible moral strength in adversity earned him the Medal of Honor He found the inspiration to go on by recalling the teachings of Epictetus an ancient Roman Stoic philosopher whom he had studied in college After his release from captivity Stockdale became president of the Naval War College where he established and team taught a course with Professor Brennan on ethics The class was extremely popular because it made philosophy relevant to the needs of professional military men and women Professor Brennan s lectures ultimately became the basis for this book

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Sailors, Statesmen and the Implementation of Naval Strategy** Agustin Guimerá,Richard Harding,Agustín Guimerá Ravina,2024 Explores the varied relationship between political leaders and naval experts from the 16th to 21st centuries The shaping of national defence strategies is particularly difficult in the case of navies Few political leaders have naval experience in contrast to the case of armies where political leaders and army commanders have often shared similar social and professional backgrounds Bringing together historical examples from Britain the United States Spain and France the book provides insights into this key relationship The authors highlight factors which have made for successful relationships between political leaders and naval experts showing how changing circumstances have affected the dialogue and underlines the importance of good exchange of knowledge expertise and understanding for successful policy making and strategic outcomes Sea power continues to be crucial in the present world s increasingly unstable geopolitical situation the mutual exchange of expertise between naval experts and political leaders is as important as ever and the risk of political sea blindness remains high This book s historical examples provide good guidance on how to manage the relationship between political leaders and naval experts well *Joint Force Quarterly* ,1995 *Parameters* ,1994 **Professional Journal of the United States Army** ,1996 **Military Review** ,1996 *The Naval War College* Lionel D. Wyld,2000-02-16 Explore the history of one of the nation s most prestigious service schools in The Naval War College It was appropriate that the U S Navy s pioneer training station and principal graduate college be established at Newport Known as The City by the Sea Newport Rhode Island has a long history of maritime activity As far back as the colonial period Newport Harbor and Narragansett Bay have always been

safe and deep havens for naval as well as commercial shipping In 1883 Commodore Stephen B Luce established the Naval Training Station on Coaster s Harbor Island in Newport which became the forerunner of the modern recruit stations for enlisted men in the U S Navy The next year in 1884 Luce established the Naval War College the first professional naval education center of its kind in the world It soon became the U S Navy s premier institution for professional studies of warfare international law and statesmanship relating to war and peace Among others Luce brought to the college Capt Alfred Thayer Mahan the naval historian whose book *The Influence of Sea Power Upon History 1600 1783* and other works influenced naval thought throughout the world *Air University Library Index to Military Periodicals* ,1996 *Leadership Embodied, 2nd Edition* Joseph J Thomas,2013-10-15 Leadership is a most demanding undertaking How do some people make it seem so simple so natural and instinctive In the age old debate as to whether leaders are born or made Thomas contends that the answer is both Great leaders throughout history were born with certain capabilities Preparation honed those capabilities Then that ability and preparation were combined with a will to lead When circumstances demanded the great leaders of history pulled these attributes together to create results that drove the course of history While leaders are present in every aspect of human undertaking we chose to illustrate each of the components of leadership through the most dramatic and demanding of all human undertakings war and the preparations for war Wartime leaders are leaders writ with a darker pen Wartime challenges are because of the life and death nature of the affair more monumental and exacting In the selection of individuals to illustrate each point we chose wartime leaders as well as those who guided their subordinates and organizations in preparation for combat Further we chose American leaders with a distinct and obvious bias towards the navy and Marine Corps Multiple reasons led us to our approach for *Leadership Embodied* First a biography is perhaps the most effective method for imparting leadership lessons Simple listings of prescriptive traits or descriptive qualities are patronizing and frequently boring Second our biographical examples are familiar to most or at least they should be Finally all of these historical selections have dramatically shaped today s institutions practices and customs within the naval services These are not marginal figures with marginal influence The individuals included and their respective leadership attributes should be required reading for any student of leadership Each has a particular lesson for midshipmen on their journey to becoming a navy or Marine Corps officer This book does not promise to be a panacea There is no short cut Leadership does not follow a prescribed path We study examples to inspire us to become better to be strong when it is easy to give in and to know others have gone before us and faced insurmountable odds Leadership as an ill defined social science crosses boundaries with several disciplines including sociology psychology philosophy and history We have selected a method that combines the psychological profile of effective leaders and the historical context of the impact their leadership brought to organizations and events Our hope for this book is that these case studies illustrate the basic elements in themselves the very essence of leadership It is through inherent talent arduous preparation and practical experience that we become capable

leaders The reader brings the first to the table then we offer a small token in the second pursuit and circumstances enable the third **Ethics, Easier Said Than Done** ,1991 **Thoughts of a Philosophical Fighter Pilot** James B.
