## **Foundations Of Organizational Strategy:**

Foundations of Organizational Strategy Michael C. Jensen, 2011 There are three main elements in an organization's total strategy: its competitive strategy, its organization strategy, and its human strategy. This volume contains twelve articles written over the last twenty-five years which deal with a firm's organizational strategy. In these articles, my co-authors noted in each chapter and I lay out the foundations of a theory of organizations that is both integrated and powerful. The development of this material had its genesis in the early 1970s at the University of Rochester where two complementary initiatives spurred this effort. One was the research that William Meckling and I began on agency theory in 1973 which opened up a new set of insights into the behavior of managers and firms. The second was the course development effort that Meckling and I began at the same time which has led to major courses at both Rochester and Harvard. In our course at Harvard Business School entitled *Coordination Control and the Management of Organizations* (CCMO), my colleagues George Baker, Carliss Baldwin, Karen Wruck, and Malcolm Salter and I apply the concepts to a wide range of management and organizational problems. The course, one of the most successful in the second year of the MBA program, attracts about 600 students each year. The history of the course is summarized in *Organizations and Markets* at the Harvard Business School, 1984-1996, by Michael C. Jensen, George Baker, Carliss Baldwin, and Karen H. Wruck. In *The Intellectual Venture Capitalist*, John H. McArthur, and the *Work of Harvard Business School*, 1980-1995, edited by Thomas K. McCraw and Jeffrey L. Cruikshank, Harvard Business School Press, 1998. This article and a complete description of the CCMO course, including the course syllabus, reading list, course notes, and practice questions, are available in four electronic documents at *Coordination Control and the Management of Organizations*. **Foundations of Organizational Strategy** Michael C. Jensen, 2001-03-02 Presenting the foundations of an integrated theory of organizations, Jensen argues that the cost of transferring information necessitates decentralization of some decision rights in organizations and economies. This, in turn, requires organizations to solve the control problem that results when self-interested persons do not behave as perfect agents.
