Conceptual Foundations of Social Research Methods David Baranov, 2021-02-25 This book probes the complex methodological choices facing social researchers and students who are applying or learning the methods of social research The author shows how an understanding of social research requires close consideration of the underlying conceptual frameworks from neopositivism to structuralism hermeneutics and anti foundationalism that shape how one studies society Baranov introduces each philosophical tradition

and shows how decisions about research design and methodology are affected by them He also explains the practical and ethical consequences that follow from methodological choices The book s approach is non doctrinaire and the prose style is accessible concrete and jargon free Research Methods and Society Linda Eberst Dorsten, Lawrence Hotchkiss, 2016-09-17 Provides a foundation for understanding research findings in social sciences Designed to help students acquire basic skills in the methods of social science research the second edition of Research Methods and Society contains numerous excerpts from professional journal articles scholarly books and popular press The text uses a straightforward writing style to present essential information without eliminating key concepts tools and their applications Concrete everyday examples and hands on practice activities reinforce fundamental concepts that will be useful to students in their future careers and life Topics are illustrated in ways that are student centered yet instructor friendly Features and updates to this 2nd edition include Highlighted concepts and terms in each chapter In addition to a chapter end list of key terms These familiarize students with important content and helps ensure they understand and retain it Chapter summaries Includes a section titled Your Review Sheet Questions Discussed in This Chapter Enables students to review the major themes presented in each chapter and encourages them to reflect on the key points Numerous real world activities Help students meet specific learning needs such as evaluating excerpts from research articles analyzing secondary data and analyzing primary data from direct observation and other mini projects Excerpts from professional journal articles and popular press readings these are followed by questions which guide learning on specific methods topics and illustrates specific issues related to methodology typically employed by social scientists Added and expanded discussion of Ethics with special attention to chapters on direct methods of data collection as well as new discussions about online research New secondary data tables and their discussions applications

Making Sense of Social Research Methodology Pengfei Zhao, Karen Ross, Peiwei Li, Barbara Dennis, 2021-01-11 Making Sense of Social Research Methodology A Student and Practitioner Centered Approach introduces students to research methods by illuminating the underlying assumptions of social science inquiry Authors Pengfei Zhao Karen Ross Peiwei Li and Barbara Dennis show how research concepts are often an integral part of everyday life through illustrative common scenarios like looking for a recipe or going on a job interview The authors extrapolate from these personal but ubiquitous experiences to further explain concepts like gathering data or social context so students develop a deeper understanding of research and its applications outside of the classroom Students from across the social sciences can take this new understanding into their own research their professional lives and their personal lives with a new sense of relevancy and urgency This text is organized into clusters that center on major topics in social science research The first cluster introduces concepts that are fundamental to all aspects and steps of the research process These concepts include relationality identity ethics epistemology validity and the sociopolitical context within which research occurs The second and third clusters focus on data and inference These clusters engage concretely with steps of the research process including

decisions about designing research generating data making inferences Throughout the chapters Pause and Reflect open ended questions provide readers with the space for further inquiry into research concepts and how they apply to life Research Scenario features in each chapter offer new perspectives on major research topics from leading and emerging voices in methods Moving from this dialogic perspective to more actionable advice You and Research features offer students concrete steps for engaging with research Take your research into the world with Making Sense of Social Research Methodology A Student and Practitioner Centered Approach **Social Research** Sotirios Sarantakos,2017-09-16 From question development and research design to data collection and statistical analysis this text guides the reader through every aspect of social research Encouraging a critical approach in each chapter this 4th edition includes enhanced coverage of internet sampling mixed methods conversation analysis and feminist research *Conceptual Foundations of Social Research Methods* David Baronov,2015-10-23 One of the common frustrations for students trying to make sense of the various debates and concepts that inform contemporary educational and social science research methods such as structuralism postpositivism hermeneutics and postmodernism is that most books introducing these topics are written at a level that assumes the reader comes to this material with a basic grasp of the underlying ideas Too often fundamental concepts and theories are presented without adequate preparation and without providing practical examples to illustrate key elements When the first edition of *Conceptual Foundations of Social Research Methods* was published it represented a sharp contrast with these other approaches and received much praise In this revised and expanded second edition David Baronov further develops his critically acclaimed treatment of the core conceptual tools of social research informing education and the social sciences updating his discussion of the current literature and adding a new chapter that explores the role of pragmatism Features of the Second Edition *Cartographies of Knowledge* Celine-Marie Pascale,2010-11-04 Mapping geographies of power and knowledge in qualitative research In this foundational tome Professor Celine Marie Pascale critiques methodology in relationship to specific qualitative methods and argues cogently that despite good intentions most of this research is still tethered to the Cartesian paradigm thus limiting its emancipatory potential This is an impressive book that will likely become a classic Eduardo Bonilla Silva Duke University co author with Tukufu Zuberi *White Logic White Methods Racism and Methodology* 2012 Winner of the International Congress of Qualitative Inquiry Distinguished Book Award Using clear language and concrete examples this text examines theoretical and historical foundations that shape the premise and logic of qualitative social research It analyzes qualitative methodology and methods in relationship to issues of agency subjectivity and experience Rooted to feminist critical race and post structural literature it is concerned with social justice as it critiques current research paradigms and advances broad alternatives This is an ideal text for students in graduate level courses in Methodology Epistemology Qualitative Research Methods Data Analysis Ethnomethodology Symbolic Interaction Phenomenology Grounded Theory and related courses the social behavioral and health sciences *Social Research Methods*

and Applications Kultar Singh, 2025-09-08 *Social Research Methods and Applications* is a comprehensive reference and inclusive account of social research methods covering all aspects of qualitative quantitative and mixed method research methodology The book walks researchers and students through every step of the research process from developing objectives selecting research methodologies sampling and providing tips on properly collecting analyzing interpreting data and disseminating findings explains how researchers can apply advanced analytical techniques using big data to analyze and interpret the social sector provides a detailed guide to using software assisted data analytical techniques for qualitative ATLAS ti NVivo etc and quantitative research STATA and SPSS details how social research methods and techniques can be applied and provides a complete account of monitoring and evaluation and how this can help track the progress and success of a project The book teaches the application of social research methods and techniques that integrate techniques from management and other social streams ranging from CBA LFA and SWOT analysis to EIA It is designed to serve as a definitive guide to undergraduate graduate and postgraduate students across the social sciences especially early researchers looking for a handy guide to research methodology Additionally it is a handy reference for professional researchers and academicians
