

The background of the book cover is a detailed illustration of a three-masted sailing ship, the HMS Erebus, partially submerged in a vast, icy Arctic landscape. The ship's hull is dark, and its masts and rigging are visible against a pale, overcast sky. In the foreground, four men in dark, heavy clothing are working on the ice. Two men on the left are pulling a rope, while two men on the right are using tools, possibly ice axes or shovels, to clear the ice. The overall tone is somber and historical, capturing the harsh conditions of the Arctic expedition.

**Four Against the Arctic** David Roberts, 2005-09-02 In 1743 four stranded Russian sailors survived the next six years in the Arctic with no provisions Making a bow and arrows from driftwood since there are no trees there they survived on reindeer meat until another ship blown off course rescued them On the Ridge Between Life and Death David Roberts, 2006-09-07 One of the world's best known writers on mountaineering recalls his climbing career and reconsiders the cost of this most perilous sport Shipwrecked on the Top of the World David Roberts, 2003 This is Roberts quest to reconstruct one of the most amazing and inspirational survival story in history the tale of how four 18th century sailors endured six years on a barren Arctic island **Ice humanities** Klaus Dodds, Sverker Sörlin, 2022-08-02 Ice humanities is a pioneering collection of essays that tackles the existential crisis posed by the planet's diminishing ice reserves By the end of this century we will likely be facing a world where sea ice no longer reliably forms in large areas of the Arctic Ocean where glaciers have not just retreated but disappeared where ice sheets collapse and where permafrost is far from permanent The ramifications of such change are not simply geophysical and biochemical They are societal and cultural and they are about value and loss Where does this change leave our inherited ideas knowledge and experiences of ice snow frost and frozen ground How will human animal and plant communities superbly adapted to cold and high places cope with less ice or even none at all The ecological services provided by ice are breath taking providing mobility water and food security for hundreds of millions of people around the world often Indigenous and vulnerable communities The stakes could not be higher Drawing on sources ranging from oral testimony to technical scientific expertise this path breaking collection sets out a highly compelling claim for the emerging field of ice humanities convincingly demonstrating that the centrality of ice in human and non human life is now impossible to ignore *Access*, 2004 *Flight to the Top of the World* David L. Bristow, 2018-07-01 In his day Walter Wellman 1858-1934 was one of America's most famous men To his contemporaries he seemed like a character from a Jules Verne novel He led five expeditions in search of the North Pole two by dogsled and three by dirigible airship and in 1910 made the first attempt to cross the Atlantic Ocean by air which the self styled expert on aerial warfare saw as a mission of world peace He endured hardships cheated death on more than one occasion and surrounded himself with a team of assistants as eccentric and audacious as he was In addition to his daring adventures Wellman became a nationally known political reporter and unofficial spokesman for the McKinley and Roosevelt administrations He was not the first newspaper sponsored adventurer but more than any of his predecessors he turned exploration into a real time media event and his reputation both flourished and suffered because of it Wellman lived during a time of rapid social and technological change when explorers were racing to fill in the last remaining blank spots on the map and when aviation promised to fulfill humanity's greatest hopes and darkest fears *Flight to the Top of the World* is a window into Wellman's time and illuminates many of its dreams and contradictions *Stranded at the Top of the World* Mary R. Tahan, Cornelia
