diverse topics as the Greco Persian Wars the Crusades and the Arab Israeli Wars **Conflict and War in the Middle East** Bassam Tibi,1998-09-28 Few studies of Middle East wars go beyond a narrative of events and most tend to impose on this subject the rigid scheme of superpower competition The Gulf War of 1991 however challenges this view of the Middle East as an extension of the global conflict The failure of the accord of both superpowers to avoid war even once regional superpower competition in the Middle East had ceased must give rise to the question Do regional conflicts have their own dynamic Working from this assumption the book examines local regional constraints of Middle East conflict and how through escalation and the involvement of extra regional powers such conflicts acquire an international dimension The theory of a regional subsystem is employed as a framework for conceptualising this interplay between regional and international factors in Tibi s examination of the Middle East wars in the period 1967 91 Tibi also provides an outlook into the future of conflict in the Middle East in the aftermath of the most recent Gulf War In Search of a Peace Settlement M. Emerging Security Threats in the Middle East Ashok Swain,Anders Jägerskog,2016-04-12 Increasingly the Middle East and its growing population face a highly complex and fragile security system The rich deposits of natural resources such as oil and gas suffer from a strained renewable resource base that includes water and arable land This leads to water scarcity desertification and land degradation Increasing population industrialization and urbanization put more and more demand on the food supply Energy insecurity may not be generally associated with the Middle East but the countries in the eastern Mediterranean part have been traditionally vulnerable to it as their fossil fuel endowments have been low Another issue is the large scale temporary labor migration and the large number of forced migrants refugees and internally displaced persons The book analyzes these emerging security challenges in a comprehensive and systematic manner It draws national and regional security issues into both the global security and human security perspectives

The Six-Day War and Israeli Self-Defense John Quigley,2013 The war of June 1967 between Israel and Arab states was widely perceived as being forced on Israel to prevent the annihilation of its people by Arab armies hovering on its borders Documents now declassified by key governments question this view The UK USSR France and the USA all knew that the Arab states were not in attack mode and tried to dissuade Israel from attacking In later years this war was held up as a precedent allowing an attack on a state that is expected to attack It has even been used to justify a pre emptive assault on a state expected to attack well in the future Given the lack of evidence that it was waged by Israel in anticipation of an attack by Arab states the 1967 war can no longer serve as such a precedent This book seeks to provide a corrective on the June 1967 war

Negotiated Risks Rudolf Avenhaus,Gunnar Sjöstedt,2009-04-28 The International Institute for Applied Systems Analysis IIASA has had risk as a

research topic on its agenda right from its inception in 1972 Risk has played a jor role in the Energy Program with research being carried out both in house and in cooperationwith other internationalinstitutions like the InternationalAtomic ergy Agency IAEA and national research centers Research areas were primarily the evaluationof all possible risks within one categoryof energysupply like nuclear ssion or fusion or fossil fuels and even more important the comparisionof risks of different energy supplystrategies Later on an independent program was started which still exists today under the name Risk and Vulnerability There is a large amount of literature on risks to which IIASA s research programs have contributed signi cantly over the years and there is of course an abundance of published work on international negotiations part of which is a result of the work of the Processes of International Negotiation PIN Program There are however so far no studies on the combination of these two strands Therefore and as research on both topics is housed at IIASA we are happy that our PIN Program has undertaken the dif cult and important task of analyzing what the editors of this book have called negotiated risks

Ending War Chiara De Franco,Anders Engberg-Pedersen,Martin Mennecke,2021-11-29 Ending War A Dialogue across Disciplines examines how wars end from a multidisciplinary perspective and includes enquiries into the politics of war the laws of war and the military and intellectual history of war In recent years the changes in the character of contemporary warfare have created uncertainties across different disciplines about how to identify and conceptualise the end of war A whole constellation of questions arises from such uncertainties How do philosophers define ethical responsibilities in bello and post bellum if the boundary between war and peace is ever so blurred How do strategists define their objectives if the teleology of action becomes uncertain How do historians bracket the known endings of war and delve into the arguments that preceded them Which answers can international law provide for the ending of wars and which challenges remain or have recently arisen This volume addresses these questions and enables both an understanding of how the end as a concept

informs the understanding of war in international relations in international law and in history as well as a reconsideration of the nature of scientific method in the field of war studies as such The chapters in this book were originally published as a special issue of The Journal of Strategic Studies
