The Science of Leadership: Lessons from Research for Organizational Leaders Julian Barling, 2014-01-02. In *The Science of Leadership*, Julian Barling takes an evidenced based approach, relying primarily on the knowledge generated from research on organizational leadership conducted around the world and personal reflections based on two decades of involvement in leadership research and leadership development with executives. While leadership has been studied within all the major social sciences, Barling mainly focuses on findings from psychological research. The first part of the book explains the nature of organizational leadership, responds to the question of whether leaders matter and explains how leadership works. A longstanding issue is whether leadership can be taught. Barling explores the debate over whether leadership is born or made, as well as the effectiveness of leadership development interventions in organizations. He gives consideration to what can be learned from leadership in other contexts such as sports, the political arena and schools, and devotes individual chapters to topics that include gender and leadership, destructive leadership and followership.

The Fourth Gospel in Four Dimensions D. Moody Smith, Jr., 2021-04-28. Compelling perspectives on the Gospel of John from a premiere scholar of the subject. This multidimensional volume from the leading American scholar of Johannine studies brings together D. Moody Smith's germinal

works from the past two decades along with some original articles published here for the first time The resulting collection augments current understanding of the Gospel of John with fresh insights and research and points the way toward opportunities for new inquiry The collection is structured around four focal issues that define contemporary studies of John In the first section Smith places the book within its Jewish milieu attempting to account for the tension between the work's seeming anti Jewishness and its familiarity with Jewish life and thought Next Smith engages the relationship between John and the historical figure of Jesus especially the extent to which John's representation of Jesus reflects knowledge of independent traditions as well as the self consciousness of his own community The third section examines John's account against the Synoptic Gospels assessing the evidence of John's access to an independent record of the passion and the possibility that John adopted the gospel genre from Mark Finally Smith explores how the Gospels and especially that of John evolved into scripture and how they have come to be interpreted in conjunction with one another

Political Leaders and Democratic Elections Kees Aarts, André Blais, Hermann Schmitt, 2013-03-14 Outcomes of legislative elections are typically reported in terms of party support how many votes and seats were obtained by each party But in fact voters are faced with three choices which must be folded into one They must decide which party they prefer but in so doing they must take account of the policies advocated by these parties and the leaders who will eventually have to enact them This simple fact raises question about the relative weight of these considerations and especially the importance granted to the leaders This issue has been largely neglected in the vast literature on voting behaviour The dominant traditions in the study of voting behaviour focus on political parties and party identification and on political issues and ideology respectively This volume uses election surveys over the past 50 years to systematically assesses the impact of political leaders on voting decisions in nine democracies Australia Britain Canada Germany the Netherlands Norway Spain Sweden and the United States It analyses issues such as the changes in political communication particularly the rise of televised politics and the relative importance accorded to political leaders in different types of political systems It demonstrates how electoral systems and other political institutions have a discernible effect on the importance voters accord to actual political leaders Contrary to popular wisdom Political Leaders and Democratic Elections shows how unimportant the characteristics of political leaders parties and indeed the voters themselves actually are on voting patterns The volume shows that voters tend to let themselves be guided by the leaders they like rather than being pushed away from those they dislike Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The Comparative Politics series is edited by Professor David M Farrell School of Politics and International Relations University College Dublin Kenneth Carty Professor of Political Science University of British Columbia and Professor Dirk Berg Schlosser Institute of Political
