

# HEURISTICS

A heuristic is a mental shortcut that enables people to make quick but less-than-optimal decisions.

## OVERVIEW

Tversky & Kahneman created the concept of heuristics in the early 1970s. They describe them as "judgmental shortcuts that generally get us where we need to go – and quickly – but at the cost of occasionally sending us off course."

Heuristics are both positive and negative for our lives. They can also be leveraged in marketing situations to manipulate people's decisions.

## EXAMPLE

- **Availability Heuristic:** Making decisions based upon information that is easily available.
- **Anchoring Heuristic:** Making decisions based upon a subjective anchoring point that influences all subsequent thinking on a topic.
- **Affect Heuristic:** Making decisions based on emotions, moods, and "gut feelings" rather than logic.

format When a fair value loss occurs fair value disclosures presented in a salient presentation format decrease decision usefulness Thus investors have varying information needs that are strongly linked to the development of a firm s key asset
