Revival: Cartels, Concerns and Trusts (1932) Robert Liefmann,2018-05-08 This volume makes available to English

readers the best known and most frequently quoted study of industrial combination from the German point of view There is an abundance of literature on the trusts from economists who have lived close to that evolution and the trusts by their more challenging position were for two decades the centre of the discussion which turned on what in industry was safe for democracy Meanwhile in Germany the alternative of the cartel was having a less noticed a controversial development until in Westphalia there was created out of lower forms a working model which was new and unique in the manner in which it related producers to each other and to the market In only a few industries has this model been fully established but it presents a rival type to the trusts and places the problem of combination on a different basis of analysis and tendency The distinction between these two forms may be a matter of industries or of national law and psychology or they may work together the cartel being the general envelop within which fusions are created the types are nevertheless distinct so much so that rationalization as a general term rather denotes than defines them both IN America the Cartel is illegal so that industry has sought its administrative solution in fusions in England trusts and cartels co exist in Germany they are interlaced great trusts having their feet in one cartel their shoulders in another and their heads in a third **Fourteen Songs from "When We Were Very Young"** Harold Fraser-Simson,Ernest Howard Shepard,1943 Songs written to accompany the Winnie the Pooh stories
