Henry Parker Manning, 1921 *The Fourth Dimension Simply Explained: A Collection of Essays Selected from Those Submitted in the Scientific American's Prize Competition* Anonymous, 2017-08-18 **The Fourth Dimension Simply Explained (Illustrated Edition) (Dodo Press)** Henry P. Manning, 2009-06 Henry Parker Manning 1859 1956 was an American professor of mathematics In 1889 he entered Johns Hopkins University to study mathematics astronomy and physics When he received his Ph D degree in 1891 his first printed paper had already appeared in the American Journal of Mathematics When he was nearly seventy Manning learned early Egyptian hieroglyphics and collaborated with Arnold Buffum Chace in his publication of the Rhind Mathematical Papyrus He retired in 1930 and spent several years as associate editor of the American Mathematical Monthly Amongst his other works are Non Euclidean Geometry 1901 Irrational Numbers and Their Representation by Sequences and Series 1906 *The Fourth Dimension Simply Explained* 1910 and *Geometry of Four Dimensions* 1914 *The Fourth Dimension Simply Explained* Henry Parker Manning, 1910 **The Fourth Dimension Simply Explained** Henry Parker Manning, 1921 *The Fourth Dimension Simply Explained, Etc* Henry Parker MANNING, 1921 *The Fourth Dimension Simply Explained* Henry Parker Manning, 2017-12-15 Excerpt from *The Fourth Dimension Simply Explained A Collection of Essays Selected From Those Submitted in the Scientific American's Prize Competition* The Five Hundred Dollar prize was awarded by the judges to lieut col Graham Denby Fitch Corps of Engineers U S A The prize winning essay was published in the Scientific American of July 1909 and three essays which received honorable mention made their appearance in the issues of July 10th 17th and 24th 1909 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition* Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea

encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak

The Unconscious as Space Anca Carrington, 2024-06-03 The Unconscious as Space explores the experience of being and the practice of psychoanalysis by thinking of the unconscious in mathematical terms Anca Carrington introduces mathematical models of space from dimension theory to algebraic topology and knot theory and considers their immediate psychoanalytic relevance The hypothesis that the unconscious is structured like a space marked by impossibility is then examined Carrington considers the clinical implications with particular focus on the interplay between language and the unconscious as related topological spaces in which movement takes place along knot like pathways The Unconscious as Space will be of appeal to psychotherapists psychoanalysts and mental health professionals in practice and in training

The Emergence of the Fourth Dimension Mark Blacklock, 2018-04-05 The Emergence of the Fourth Dimension describes the development and proliferation of the idea of higher dimensional space in the late nineteenth and early twentieth centuries An idea from mathematics that was appropriated by occultist thought it emerged in the fin de siècle as a staple of genre fiction and influenced a number of important Modernist writers and artists Providing a context for thinking of space in dimensional terms the volume describes an active interplay between self fashioning disciplines and a key moment in the popularisation of science It offers new research into spiritualism and the Theosophical Society and studies a series of curious hybrid texts Examining works by Joseph Conrad Ford Madox Ford H G Wells Henry James H P Lovecraft and others the volume explores how new theories of the possibilities of time and space influenced fiction writers of the period and how literature shaped and was in turn shaped by the reconfiguration of imaginative space occasioned by the n dimensional turn A timely study of the interplay between philosophy literature culture and mathematics it offers a rich resource for readers interested in nineteenth century literature Modernist studies science fiction and gothic scholarship

Other Worlds Christopher G. White, 2018-03-16 Christopher White points to ways that both spiritual practices and scientific speculation about multiverses and invisible dimensions are efforts to peer into the hidden elements and even existential meaning of the universe Creatively appropriated these ideas can restore a

spiritual sense that the world is greater than anything our eyes can see **The Gregg Writer** ,1911 Shadows of Reality
Tony Robbin,2008-10-01 In this insightful book which is a revisionist math history as well as a revisionist art history Tony Robbin well known for his innovative computer visualizations of hyperspace investigates different models of the fourth dimension and how these are applied in art and physics Robbin explores the distinction between the slicing or Flatland model and the projection or shadow model He compares the history of these two models and their uses and misuses in popular discussions Robbin breaks new ground with his original argument that Picasso used the projection model to invent cubism and that Minkowski had four dimensional projective geometry in mind when he structured special relativity The discussion is brought to the present with an exposition of the projection model in the most creative ideas about space in contemporary mathematics such as twisters quasicrystals and quantum topology Robbin clarifies these esoteric concepts with understandable drawings and diagrams Robbin proposes that the powerful role of projective geometry in the development of current mathematical ideas has been long overlooked and that our attachment to the slicing model is essentially a conceptual block that hinders progress in understanding contemporary models of spacetime He offers a fascinating review of how projective ideas are the source of some of today s most exciting developments in art math physics and computer visualization

Mandelstam's Worlds Andrew Kahn,2020-07-28 Rightly appreciated as a poet s poet Mandelstam has been habitually read as a repository of learned allusion Yet as Seamus Heaney observed his work is as firmly rooted in both an historical and cultural context as real as Joyce s Ulysses or Eliot s Waste Land Great lyric poets offer a cross section of their times and Mandelstam s poems represent the worlds of politics history art and ideas about intimacy and creativity The interconnections between these domains and Mandelstam s writings are the subject of this book showing how engaged the poet was with the history social movements political ideology and aesthetics of his time The importance of the book also lies in showing how literature no less than history and philosophy enables readers to confront the huge upheaval in outlook can demand of us thinking with poetry is to think through the moral compromise and tension felt by individuals in public and private contexts and to create out of art experience in itself The book further innovates by integrating a new comprehensive discussion of the Voronezh Notebooks one of the supreme achievements of Russian poetry This book considers the full political dimension of works that explore the role of the poet as a figure positioned within society but outside the state caught between an ideal of creative independence and a devotion to the original ameliorative ideals of the revolution Ghost-Seers, Detectives, and Spiritualists Srdjan Smajić,2010-04-29 This book is a study of the narrative techniques that developed for two very popular forms of fiction in the nineteenth century ghost stories and detective stories and the surprising similarities between them in the context of contemporary theories of vision and sight Srdjan Smaji argues that to understand how writers represented ghost seers and detectives the views of contemporary scientists philosophers and spiritualists with which these writers engage have to be taken into account these views raise questions such as whether seeing really is believing how much of

what we see is actually only inferred and whether there may be other intuitive or spiritual ways of seeing that enable us to perceive objects and beings inaccessible to the bodily senses This book will make a real contribution to the understanding of Victorian science in culture and of the ways in which literature draws on all kinds of knowledge
