Fragmented Ties Cecilia Menjívar, 2000-07-21 This text gives a detailed account of the inner workings of the networks by which immigrants leave their homes in Central America to start new lives in the Mission District of San Francisco

Networks of Domination Paul MacDonald, 2014-05-15 In the nineteenth century European states conquered vast stretches of territory across the periphery of the international system Much of Asia and Africa fell to the armies of the European great powers and by World War I those armies controlled 40 percent of the world's territory and 30 percent of its population Conventional wisdom states that these conquests were the product of European military dominance or technological superiority but the reality was far more complex In *Networks of Domination* Paul MacDonald argues that an ability to exploit the internal political situation within a targeted territory not mere military might was a crucial element of conquest European states enjoyed greatest success when they were able to recruit local collaborators from within the society and exploit divisions among elites Different configurations of social ties connecting potential conquerors with elites were central to both the patterns of imperial conquest and the strategies conquerors employed MacDonald compares episodes of British colonial expansion in India South Africa and Nigeria during the nineteenth century and also examines the contemporary applicability of the theory through an examination of the United States occupation of Iraq The scramble for empire fundamentally shaped and continues to shape the international system we inhabit today Featuring a powerful theory of the role of social networks in shaping the international system *Networks of Domination* bridges past and present to highlight the lessons of conquest

Rúa, 2021-08-10 WINNER D Scott Palmer Prize for Best Edited Collection given by the New England Council of Latin American Studies Introduces new approaches theoretical trends and understudied topics in Latinx Studies This groundbreaking work offers a multidisciplinary social science oriented perspective on Latinx studies including the social histories and contemporary lives of a diverse range of Latina and Latino populations Editors Ana Y Ramos Zayas and Mérida M Rúa have crafted an anthology that is unique in both form and content The book combines previously published canonical pieces with original cutting edge works created for this volume The sections of the text are arranged thematically as critical dialogues each with a brief preface that provides context and a conceptual direction

for the scholarly conversation that ensues The editors frame the volume around the humanistic social sciences using the term to highlight the historical and social contexts under which expressive cultural forms and archival records are created Critical Dialogues in Latinx Studies masterfully sheds light on the diversity and complexity of the everyday lives of Latinx populations the political economic structures that shape enduring racialization and cultural stereotyping and the continuing efforts to carve out new lives as diasporic transnational global and colonial subjects

Hidden Assets Charles Ehin, 2006-07-06 Based on his diverse personal experiences and two decades of interdisciplinary research Dr Ehin unveils the mysteries and shows the practicality of tapping into the ever evolving yet extraordinarily powerful informal networks present in all social groups What this book reveals is the extraordinarily dynamic and tight linkage between three hidden organizational success factors responsible for most work accomplished in both for profit and nonprofit ventures especially in the development of new innovations The book shows why in a knowledge economy it is essential to design organizations that facilitate the fundamental collaborative and creative qualities of human nature rather than unconsciously suppressing them In doing so it is made obvious why most mergers and change efforts fail and the reasons why an average employee only works at two thirds of his her capacity This work clearly demonstrates how smart institutions can harness rather than manage these invisible emergent forces and in the process avoid the dismal record of past organizational transformation initiatives Hidden Assets is a must read not only for top executives knowledge professionals and organizational scholars but for everyone associated with private public or voluntary social institutions

Doubled Up Hope Harvey, 2025-05-06 How sharing a home with extended family or friends serves as a crucial but imperfect private safety net for families with children More than fifteen percent of US children over eleven million live in doubled up households sharing space with extended family or friends These households are even more common among low income families families of color and single parent families functioning as a private safety net for many in a country with extremely limited public support for families Yet despite their prevalence we know little about how shared households form and how they shape family life Doubled Up is an in depth look at the experiences of families with children living in doubled up households Drawing on extensive interviews with sixty parents living in doubled up households Hope Harvey examines what circumstances and motivations lead families to form doubled up households how living in shared households affects daily routines and how families fare after these arrangements dissolve Harvey shows that although families rely on doubling up to get by in the face of rapidly rising housing costs precarious labor markets and unaffordable childcare these private arrangements are rarely sufficient to overcome such structural barriers And doubling up incurs its own costs for both host and guest families For doubled up families negotiating household relationships and navigating shared space reshapes family life Understanding the dynamics of doubled up households extends scholarship on family life beyond the nuclear family and points the way toward better policies that will serve all families

Migrant Friendships in a Super-Diverse City Darya Malyutina, 2015-10-01 This timely book offers an

integrative and critical approach to the conceptualization of diversity of social ties in contemporary urban migrant populations It explores the informal relationships of migrants in London and how the construction and the dynamics of their social ties function as a part of urban sociality within the super diversity of London Based on the results of a qualitative study of Russian speaking migrants it targets the four main themes of transnationalism ethnicity cosmopolitanization and friendship Acknowledging the complexity of the ways in which contemporary migrants rely on social relationships the author argues that this complexity cannot be fully grasped by theories of transnationalism or explanations of ethnic communities alone Instead one can gather a closer understanding of migrant sociality when adding the analysis of informal relationships in different locations and with different subjects This book suggests that friendship should be seen as an important concept for all research on migrant social connections

Home Across Borders Jagath Bandara Pathirage, 2024-10-08 This book studies how transnational migrants create a sense of home in their host countries It draws on case studies of Sri Lankan migrants living in Australia to argue that home is an existential experience rather than a fixed entity The author looks at how the sense of home arises as a fresh category which is critical in defining one's existentiality in the host society Going beyond the conventional methodological approach of an ethnographer objectivizing other's sense of home into fixed categories the book attempts to foreground the immigrant's articulation of home which evolves parallel to their being It reveals how three important aspects of our lives time space and memory intersect with the trajectories of migration The author also delves into the ways in which migrants engage in building a home as a way of creating materiality in their dwelling practice Unique and compelling the book will be highly useful in studies of diaspora globalisation and transnational migration It will be of interest to students researchers and scholars of anthropology migration and transnational studies as well as sociology and other related disciplines

The Sociology of Community Connections John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decades of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of *The Sociology of Community Connections* will identify and help students understand community connectedness in the present and future

Squatter Life Javier Auyero, Sofía Servián, 2025-02-21 In *Squatter Life* sociologist Javier Auyero and anthropologist Sofía Servián detail the diverse and often precarious strategies that Argentina's urban poor rely on to survive Blending three years of ethnographic fieldwork and anthropological theory with personal narratives of Servián's experience growing up and living in a squatter settlement the authors examine how Argentina's squatter communities contend with violence and secure necessities like food land and housing despite inadequate state support and protection Auyero and Servián recount the bricolage of tactics these individuals employ to make ends meet such as relying on highly exploitative jobs patronage and networks of reciprocal exchange that can involve illicit activities Analyzing how these survival strategies intersect with class gender and political domination the authors present a nuanced account of marginality in Argentinian squatter settlements while maintaining a deeply human portrait of survival

and persistence **Reform Without Justice** Alfonso Gonzales,2014 Placed within the context of the past decade s war on terror and emergent Latino migrant movement Reform without Justice addresses the issue of state violence against migrants in the United States It questions what forces are driving draconian migration control policies and why it is that despite its success in mobilizing millions the Latino migrant movement and its allies have not been able to more successfully defend the rights of migrants Gonzales argues that the contemporary Latino migrant movement and its allies face a dynamic form of political power that he terms anti migrant hegemony This type of political power is exerted in multiple sites of power from Congress to think tanks talk shows and local government institutions through which a rhetorically race neutral and common sense public policy discourse is deployed to criminalize migrants Most insidiously anti migrant hegemony allows for large sectors of pro immigrant groups to concede to coercive immigration enforcement measures such as a militarized border wall and the expansion of immigration policing in local communities in exchange for so called Comprehensive Immigration Reform Given this reality Gonzales sustains that most efforts to advance immigration reform will fail to provide justice for migrants This is because proposed reform measures ignore the neoliberal policies driving migration and reinforce the structures of state violence used against migrants to the detriment of democracy for all Reform without Justice concludes by discussing how Latino migrant activists especially youth and their allies can change this reality and help democratize the United States
