Precedented Environmental Futures Colin Porteous,2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment

The Architects' Journal ,2006-10 Back from Utopia Hubert-Jan Henket,Hilde Heynen,2002 The Modern Movement was a clarion call to embrace new building technologies to meet the needs of the masses and to advance a new aesthetic of universality and

openness Pioneers like Le Corbusier Walter Gropius and Mies van der Rohe created a sober hard edged architecture with a utopian urgency Decades later we have witnessed both the positive and the negative results of their endeavors After the condemnations of the Modern Movement by postmodernist architects and critics it is time for a balanced reassessment Back from Utopia gathers more than 40 contributions by leading voices from the world of architecture and architectural history to reassess the modernist legacy across the world from Eastern and Western Europe to India and Japan **World**

Architecture 1900-2000 : a Critical Mosaic: South Asia Kenneth Frampton, 1999 This series of 10 volumes record s the century s most significant architectural achievements and cover s all parts of the world Altogether 1000 buildings and urban complexes have been selected by noted architectural writers and critics Within each volume one hundred significant examples represent the political economical cultural and demographic evolution of the particular region over the century The evident complexity of the enterprise cannot entirely exclude a few arbitrary choices Not only does the selection procedure reflect individual choices but also the division of the globe into transnational regions of vastly differing size and character evokes a specific appearance of world architecture Thus this architectural collection is to be understood as a critical mosaic representing as a whole the entire evolution of world architecture from 1900 2000 Bookjackets **Tropical**

Architecture Alexander Tzonis, Bruno Stagno, Liane Lefaivre, 2001 The tropical region covers a significant proportion of the globe and yet its architecture receives relatively little outside comment or exposure Dispersed widely throughout the world the region incorporates areas as far flung as the Caribbean islands India South East Asia and large parts of Australia Africa and South and Central America Despite their great cultural diversity these areas share both climatic and ecological factors as well as a post colonial condition and the pressures of modernization in the world of globalization Architects reactions to the tropical context are as varied as the region is diverse Tropical Architecture brings together architects and critics from throughout the tropical region examining the implications of the opposing forces of tradition and innovation and the struggle between global and local order Among the issues covered are sustainability bio and cultural diversity micro climatic control and technology and multi disciplinary design The argument centres on Critical Regionalism a concept introduced into the architectural debate in the early 1980s by two of the book s co authors Tzonis and Lefaivre This is not a style but rather an approach to architecture that asks for design to be conceived in response to the needs and opportunities of a specific region although it is not inherently opposed to global potentials The theoretical debate is backed up by case studies of a range of projects from small scale designs using minimal technology to super sophisticated high tech solutions and from schemes that look to environmental comfort to ones concerned with issues of symbolism and memory It is out of this multiplicity of approaches that the general global lesson of Critical Regionalism as applied to tropical architecture is to be found THE PRINCE CLAUS FUND stimulates and supports activities in the field of culture and development by granting awards funding and producing publications and by financing and promoting networks and innovative cultural activities Support is given both

to persons and to organizations in African Asian Latin American and Caribbearn countries *Typography Papers* ,2000
 The British National Bibliography Arthur James Wells,1999 **Eye** ,2001 **London Magazine** John Lehmann,Alan
Ross,1998 Archis ,1998 Subject Guide to Books in Print ,1971 **Arts & Humanities Citation Index** ,1983 A
multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading
arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social
science journals Utopia/dystopia Yasufumi Nakamori,Graham Bader,2012 Utopia Dystopia investigates how artists from
the late nineteenth century to the present have used photograpic fragments or techniques to represent political social or
cultural states of utopia or dystopia This catalogue is heavily illustrated with works from the accompanying exhibition
