now be sent alongside the minutes of the MPC meeting that followed the publication of the CPI data The remit requests that the MPC provides in its August 2013 inflation report an assessment of the merits of using intermediate thresholds policy commitments conditional on future economic developments The remit also reflects the Government's intention that the frameworks for monetary policy and macro prudential policy operated by the MPC and FPC of the Bank of England respectively should be coordinated

Macroprudential Policy - An Organizing Framework International Monetary Fund. Monetary and Capital Markets Department, 2011-03-14 Macroprudential policy is a complement to microprudential policy and it interacts with other types of public policy that have an impact on systemic financial stability Indeed prudential regulation as carried out in the past also had some macroprudential aspects and the recent crisis has reinforced this focus hence a clear separation between micro and macro prudential if useful conceptually is difficult to delineate in practice Moreover no matter how different policy mandates are structured financial stability tends to be a common responsibility reflecting the far reaching consequences of financial crises This calls for coordination across policies to ensure that systemic risk is comprehensively addressed Equally important macroprudential policy is no substitute for sound policies more broadly including in particular strong prudential regulation and supervision and sound macroeconomic policies Operational

independence in other policy areas including monetary and microprudential policy should not be undermined in the name of macroprudential policy Finally given the global nature of the financial system the multilateral aspects of macroprudential policy will need to be fully considered an important aspect that is only touched upon in this paper

economic transformation is suggested The ECB's Future Monetary Policy Operational Framework: Corridor Or Floor? Mr. Luis Brandão-Marques, Mr. Lev Ratnovski, 2024-03-15 This paper reviews the trade offs involved in the choice of the ECB's monetary policy operational framework As long as the ECB's supply of reserves remains well in excess of the banks demand the ECB will likely continue to employ a floor system for implementing the target interest rate in money markets Once the supply of reserves declines and approaches the steep part of the reserves demand function the ECB will face a choice between a corridor system and some variant of a floor system There are distinct pros and cons associated with each option A corridor would be consistent with a smaller ECB balance sheet size encourage banks to manage their liquidity buffers more tightly and facilitate greater activity in the interbank market But it would require relatively more frequent market operations to ensure the money markets rate stays close to the policy rate and could leave the banking system vulnerable to intermittent liquidity shortages that may have financial stability implications and impair monetary transmission The floor on the other hand would allow for more precise control of the overnight rate and a lower risk of liquidity shortages but it would entail a somewhat larger ECB balance sheet weaken the incentives for banks to manage their liquidity buffers and discourage interbank market activity The analysis of tradeoffs suggests that on balance in steady state a hybrid system that combines the features of the parsimonious floor with a minimal volume of reserves with a lending facility or frequent short term full allotment lending operations priced at or very close to the deposit rate making it a zero or near zero corridor would be most conducive for achieving the ECB's monetary policy objective Toward a Framework for Financial Stability Mr. Carl-Johan Lindgren, Mr. D. F. I. Folkerts-Landau, 1998-01-23 This study outlines the broad principles and characteristics of stable and sound financial systems to facilitate IMF surveillance over banking sector issues of macroeconomic significance and to contribute the general international effort to reduce the likelihood and diminish the intensity of future financial sector crises
