Accounting for Taste Priscilla Parkhurst Ferguson, 2006-08-01 French cuisine is such a staple in our understanding of fine food that we forget the accidents of history

that led to its creation Accounting for Taste brings these accidents to the surface illuminating the magic of French cuisine and the mystery behind its historical development Priscilla Parkhurst Ferguson explains how the food of France became French cuisine This momentous culinary journey begins with Ancien R gime cookbooks and ends with twenty first century cooking programs It takes us from Car me the inventor of modern French cuisine in the early nineteenth century to top chefs today such as Daniel Boulud and Jacques P pin Not a history of French cuisine Accounting for Taste focuses on the people places and institutions that have made this cuisine what it is today a privileged vehicle for national identity a model of cultural ascendancy and a pivotal site where practice and performance intersect With sources as various as the novels of Balzac and Proust interviews with contemporary chefs such as David Bouley and Charlie Trotter and the film Babette s Feast Ferguson maps the cultural field that structures culinary affairs in France and then exports its crucial ingredients What s more well beyond food the intricate connections between cuisine and country between local practice and national identity illuminate the concept of culture itself To Brillat Savarin s famous dictum Animals fill themselves people eat intelligent people alone know how to eat Priscilla Ferguson adds and Accounting for Taste shows how the truly intelligent also know why they eat the way they do Parkhurst Ferguson has her nose in the right place and an infectious lust for her subject that makes this trawl through the history and cultural significance of French food from French Revolution to Babette s Feast via Balzac s suppers and Proust s madeleines a satisfying meal of varied courses Ian Kelly Times UK *Catalog of Copyright Entries. Artificial Color Catherine Keyser,2019 This book examines how modern US writers used the changing geographies regimens and technologies of modern food to reimagine racial classification and to question its relationship to the mutable body By challenging a cultural ideal of purity this literature proposes that racial whiteness is perhaps the most artificial color of them all **Food and Landscape: Proceedings of the 2017 Oxford Symposium on Food and Cookery** Mark McWilliams,2018-07-01 The proceedings of the 2017 Oxford Symposium on Food and Cookery includes 43 essays by international scholars The topics included agro ecology food sovereignty and economic democracy in the agricultural landscape argued by Colin Tudge James Rebanks on family life as a hill farmer in the Lake District and many talks that
