France Nato And The Limits Of Independence 1981 1997 The Politics Of Ambivalence:

France, NATO and the Limits of Independence 1981-97 A. Menon, 2000-01-12 This book presents the first in depth assessment of France's policies towards NATO between 1981 and 1997. It also provides a critical assessment of these policies. It argues that France's arms length relationship with NATO's integrated military structure served its purpose during the Cold War but increasingly came to impose high costs thereafter. NATO (Not for Individual Sale) G. Schmidt, 2019-06-12 NATO

The First 50 Years offers the first comprehensive study of the institution's activities and development over the past five decades. Written by a team of international scholars, it analyses the factors which have made NATO the most successful politico-military alliance in history. It also addresses the perennial problems of transatlantic relationships, the problems that the Alliance grapples with today. A wide-ranging and masterful survey, NATO The First 50 Years will be a useful reference work for researchers as well as an accessible guide for students.

Norm Dilemmas in Humanitarian Intervention Yuki Abe, 2018-12-21 NATO, an organisation brought together to function as an anti-communist alliance, faced existential questions after the unexpected collapse of the USSR at the beginning of the 1990s. Intervention in the conflict in Bosnia between 1992 and 1995 gave it a renewed sense of purpose and a redefining of its core mission. Abe argues that an impetus for this change was the norm dilemma that the conflict in Bosnia represented. On the one hand, a state which oversaw the massacre of its civilians was in breach of international norms, but on the other hand, intervention by outside states would breach the norms of sovereign integrity and non-use of force. NATO, as an international governance organisation, thus became a vehicle for avoiding this kind of dilemma. A detailed case study of NATO during the Bosnian war, this book explores how the differing views and preferences among the Western states on the intervention in Bosnia were reconciled as they agreed on the outline of NATO's reform. It examines detailed decision-making processes in Britain, France, Germany, and the USA. In particular, Abe analyses why conflicting norms led to an emphasis on conflict prevention capacity rather than simply on armed intervention capacity.

The New Security Concept and German-French Approaches to the European "Pillar of Defence," 1990-2000 Siret Hürsoy, 2002 A historic opportunity without precedent is gradually becoming reality in the 21st Century with the chance taken to pave the way in the period 1990-2000 towards the organisation of defence in Europe. The corresponding conditions have been brought about by concrete steps taken at the Maastricht, Amsterdam, Cologne, Helsinki, and Nice European Council meetings. In the end, the EU/WEU is developing into an equal partner to the US by assuming greater responsibility in the security and defence sphere. The French and German bilateral relationship, which is the driving force behind every European integration process, is the historical force behind this development. The ultimate desire to reach a robust European Pillar of Defence through reconfiguration of the transatlantic relationship. This book provides the first comprehensive and up-to-date analysis of German and French approaches to the European Pillar of Defence from the view of Europeanisation emanating from the process of integration.

Security Culture in Times of War: Frank Reimers,2020-08-07 This book uses a comparative case study approach to examine how security cultures change under the impact of political shocks and learning through failure The book thus analyzes the security cultures of Germany and the United States as they evolve under the impact of the war in Bosnia Herzegovina from 1992 to 1995 The thesis thereby also enhances our understanding of German and U S foreign policies Using paired observations for controlled comparison the thesis employs process tracing to examine the nature and quantity of change The case studies demonstrate that security cultures influence the assessment of political situations restrain policy objectives and condition the range of issues to which political attention is devoted Both cases reveal that security cultures affect the evaluation of policy options and the choices that are made The thesis argues that different transformations of German and U S security cultures led to divergent political behavior particularly with regard to the use of force resulting in more forceful and effective interventions in Bosnia and a reframing of future interventions in third party conflicts Domestic reactions to the Bosnian war transformed the security culture in Germany whereas reactions in the U S triggered a re ranking of cultural preferences Understanding how security cultures change and evolve through exogenous and endogenous factors improves the chances of policy success in today s challenging international environment

Poland David H. Dunn,Marcin Zaborowski,2004-11-23 This authoritative volume assesses how the recently democratized political system in Poland is adapting to the challenges posed by the country s adhesion to NATO which it joined in 1999 The contributors analyse Poland s performance as a newcomer

The Withering of the Welfare State J. Connelly,J. Hayward,2012-02-07 Since the 1970s the public commitment to

social solidarity between citizens through comprehensive provision of welfare has been eroded by the imperatives of international markets In this volume the problems posed to public intervention are analyzed The contributors compare and evaluate how different countries have dealt with these challenges (In)*Security and the Production of International Relations* Jonas Hagmann,2014-11-27 This book provides a framework for analysing the interplay between securitisation and foreign affairs reconnecting critical security studies with traditional IR concerns about interstate relations What happens to foreign policymaking when actors things or processes are presented as threats This book explains state behaviour on the basis of a reflexive framework of insecurity politics and argues that governments act on the knowledge of international danger available in their societies but that such knowledge is organised by markedly varying ideas of who threatens whom and how The book develops this argument and illustrates it by means of various European case studies Moving across European history and space these case studies show how securitisation has projected evolving and often contested local ideas of the organisation of international insecurity and how such knowledges of world politics have then conditioned foreign policymaking on their own terms With its focus on insecurity politics the book provides new perspectives for the study of international security Moving the discipline from systemic theorising to a theory of international systematisation it shows how world politics is in practice often conceived in a different way than that assumed by IR theory By the same token by depicting national insecurity as a matter of political construction the book also raises the challenging question of whether certain projections of insecurity may be considered more warranted than others This book will be of much interest to students of critical security studies European politics foreign policy and IR in general **NATO's European Allies** J. Matlary,M. Petersson,2013-01-30 The question of burden sharing has always been important in NATO with an acute relevance today as the US will cut its defence budget over a ten year period and is no longer automatically willing to lead military operations This volume considers Europe s role in political force for the future exploring eight European case studies

Security, Defense Discourse and Identity in NATO and Europe Falk Ostermann,2018-08-06 Analyzing changes in the role and place of NATO European integration and Franco American relations in foreign policy discourse under Presidents Jacques Chirac and Nicolas Sarkozy this book provides an original perspective on French foreign policy and its identity construction The book employs a novel research design for the analysis of foreign policies which can be used beyond the case of France by combining the discourse theory of the Essex School with Interpretive Policy Analysis to examine political ideas and how they are organized into a foreign policy identity On these grounds the volume undertakes a comparative analysis of parliamentary and executive discourse of President Chirac s failed attempt at NATO reintegration in the 1990s Sarkozy s successful attempt in the 2000s and the Libyan War Ostermann depicts French foreign policy and identity as turning away from the European Union atlanticizing and losing its American nemesis As a result France uses a much more pragmatic de unionized and pro American strategy to implement foreign policy objectives than before Offering a new and innovative

explanation for a major change in French foreign policy and grand strategy this book will be of great interest to scholars of NATO European defense cooperation and foreign policy *European Union Foreign Policy* C. Bickerton,2015-08-16 Scholars and policymakers in EU foreign policy lament the EU's inability to assert itself on the world stage This book explains this weakness by arguing that EU foreign policy is burdened by various internal functions and systemizes the analysis of internal functionality pushing the study beyond the concern with effectiveness *Transaction Costs and Security Institutions* M. Weiss,2011-04-12 Examines international cooperation in European security from a transaction cost economics perspective This book addresses the puzzle of how to approach differing institutional preferences It argues that the reduction and limitation of transaction costs was the primary determinant of security preferences **France and the Construction of Europe, 1944-2007** Michael Sutton,2011-03 This comprehensive history shows how France coupled the pursuit of power and the furtherance of European integration over a 60 year period from the close of the Second World War to the hesitation caused by the French electorate's referendum rejection of the European Union's constitutional treaty in 2005 **Allies at Odds?** T. Mowle,2004-10-28 Why despite their similar goals do the policy preferences of the European Union and United States diverge on so many multilateral issues To answer that question *Allies at Odds* thoroughly examines recent international efforts in arms control environmental protection human rights and military cooperation Evidence from 20 separate cases supports the expectations of the realist approach to international politics which focuses on the role of power above all Neither cultural factors nor international institutions have as much influence as some expect This finding was as true during the Clinton Presidency as during the Bush indicating that focusing on personalities overlooks more substantial and longer lasting differences between the Atlantic allies *The Unipolar World* T. Mowle,D. Sacko,2007-03-19 This is the first book length treatment of international politics in a unipolar world that adopts a structural realist perspective It applies Waltz's microeconomic analogy to a market with a price leader It concludes that unipolarity is sustainable as long as the unipole distributes rewards to other states France Paul Belkin,2012-10-19 **IBSS** Compiled by the British Library of Political and Economic Science,2001 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences
