Electoral Reform Alan Renwick, 2010-02-04 Elections lie at the heart of democracy and this book seeks to understand how the rules governing those elections are chosen Drawing on both broad comparisons and detailed case studies it focuses upon the electoral rules that govern what sorts of preferences voters can express and how votes translate into seats in a

legislature Through detailed examination of electoral reform politics in four countries France Italy Japan and New Zealand Alan Renwick shows how major electoral system changes in established democracies occur through two contrasting types of reform process Renwick rejects the simple view that electoral systems always straightforwardly reflect the interests of the politicians in power Politicians motivations are complex politicians are sometimes unable to pursue reforms they want occasionally they are forced to accept reforms they oppose The Politics of Electoral Reform shows how voters and reform activists can have real power over electoral reform

Faces on the Ballot Alan Renwick,Jean-Benoît Pilet,2016 One of the key shifts in contemporary politics is the trend towards greater personalization Collective actors such as political parties are losing relevance Citizens are slowly dealigning from these actors and individual politicians are therefore growing in importance in elections in government within parties and in media reporting of politics A crucial question concerns how this new pattern could be restructuring politics over the long run notably whether the

personalization of politics is changing the institutional architecture of contemporary democracies The authors show that the trend towards personalization is indeed changing core democratic institutions Studying the evolution of electoral systems in thirty one European democracies since 1945 they demonstrate that since the 1990s there has been a shift towards more personalized electoral systems Electoral systems in most European countries now allow voters to express preferences for candidates not just for political parties And the weight of these voters preferences in the allocation of seats has been increased in numerous countries They examine the factors that appear to be driving this evolution finding that the personalization of electoral systems is associated with the growing gap between citizens and politics Politicians and legislators appear to perceive the personalization of electoral systems as a way to address the democratic malaise and to restore trust in politics by reducing the role of political parties in elections The book also shows however that whether these reforms have had any success in achieving their aims is far less clear Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The Comparative Politics series is edited by Emilie van Haute Professor of Political Science Universite libre de Bruxelles Ferdinand Muller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow Chair of the Department of Political Science University of Houston

France since the 1970s Emile Chabal, 2014-12-18 Until the mid 20th century France saw itself as a great power with universalist aspirations and global ambitions But the Second World War and decolonisation irrevocably changed France's place in the world Despite attempts to restore the country's grandeur in the 1960s the French have been forced to reconcile themselves to their modest place at the heart of a changing Europe What impact has this had on political life How have the French reimagined the revolutionary republican and reactionary ideologies that have been so crucial to their history How has the arrival of hundreds of thousands of postcolonial migrants transformed politics These are just some of the questions at the heart of France since the 1970s With contributions from leading specialists on topics as varied as the legacy of empire and neo liberalism it explores how the French have dealt with the pervasive sense of uncertainty that has become a defining feature of contemporary European politics

Parties and the Party System in France A. Knapp, 2004-03-12 The French elections of 2002 broke all records for fragmentation abstention and far right protest voting yet returned incumbent President Chirac in triumph and gave him a solid basis of parliamentary support Parties and the Party System in France seeks to explain the paradox of France's current relationship to politics through a comprehensive analysis of French political parties and their interaction over the last fifty years set against the two contexts of French history and of contemporary theories of parties and party systems
