Mad Cows and Mother's Milk, Second Edition William Leiss, 2004-11-25 Communicating the nature and consequences of environmental and health risks is still one of the most problematic areas of public policy in Western democracies Mad Cows and Mother's Milk outlines the crucial role of risk management in dealing with public controversies and analyses risk communication practice and malpractice to provide a set of lessons for risk managers and communicators This second edition adds new case studies on mad cow disease in North America climate change and genetics technologies The first of the new case studies brings the story of the Bovine Spongiform Encephalopathy BSE outbreak in the United Kingdom in the 1980s up to date Mad cow disease is still being discovered in UK herds and cases of mad cow disease have been found in twenty countries across the European continent and as far away as Japan with devastating consequences for the food industry BSE has now been discovered on the North American continent in two cows born in Canada The original cause of these two new cases is almost certainly importation of infected cattle cattle feed or both from Britain Canadian government regulators and those in the cattle industry have failed to correctly assess the risks of the disease in the Canadian herd take the precautionary measures needed to prevent the spread of disease and communicate risks and precautionary measures to the public The second new study deals with global warming Not only is every aspect of this risk debate both contentious and difficult for the public to understand but the potential consequences of the risks extend all the way to global catastrophe for human civilization A new chapter outlines the many dimensions of risk debate in the context of the need for effective and sustained dialogue by an informed public The last new case study provides an introduction to genomic science which is placed in the context of both the health benefits expected from genetic manipulation and some of the risk factors associated with it One example is gene therapy which can be used to eliminate inherited genetic diseases i.e. cystic fibrosis enhance human traits i.e. athletic performance and perhaps double life spans Gene technologies are relevant to some of the most fundamental human values This new chapter suggests that we must think about the range of new risks introduced by these technologies as well as the potential benefits and that we should do this collective thinking soon since given the furious

pace of genomics discoveries the possibilities will be with us sooner than we imagine All of the case studies emphasize the need for effective communication about risks to allow effective dialogue by informed publics on health and environmental risks Mad Cows and Mother's Milk Douglas Alan Powell, William Leiss, 1997 When toxins are suspected to be the cause of illness or death governments scientists and professional health associations are faced with a dilemma at what point does sufficient evidence justify changes in policy or the issuance of public warnings which might result in undue public fear Powell food science U of Guelph and Leiss environmental policy Queen s U Canada discuss mad cow s disease silicone in breast implants E coli in hamburger and dioxins in the environment in terms of available scientific research and the question of assessing actual risk Paper edition unseen 19 95 Annotation copyrighted by Book News Inc Portland OR **Soldiers** ,1987

My Sister's Veil K.C. Marshall, 2009-02-12 PREFACE MY SISTERS VEIL a poem
 Tonis Veil A beautiful face is never enough To guarantee love success and trust Torn and conflicted by what they see and say Maybe they're right It's better their way They always win So of course we would choose To perpetrate a look That will never lose Ill just take it to the twelfth degree So it appears self-righteously To be me So bury the mirror And who you really see And bury the hatred Of who you really be Then it's easy to forget the grief And promise yourself You can become A respectable Thief Terris Veil Restless and young With nothing to lose Thrown into your world Unblemished unbruised Ready to grow and trust and learn But guns fill your hands before you discern The value of life community and respect A simple way to mask your intellect Apprentice of self-destruction A king with no crown Frustrated and confused By the systematic run around Yet a gnarly lesson awaits to prove It's by your own hand You win or you lose Tinas Veil Abandoned and ashamed Afraid and unloved I hid my pain As innocently as a dove The Lord answers prayers So invisible Ill be cause my blllack and nappy Embarrasses thee If only but For a genuine veil Id lose myself In self-medicated hell But no need to worry No need to fret Their yaki hair and blue contacts Are easy to get Spare not a dime For value and worth Designer labels and gold To our pride gives birth So strut on high and lively and proud As you die slowly With a legacy Broken and loud
