Sc Mba, 2013-06 Can the movements of Jupiter Saturn and Uranus affect market cycles Are prices swings on the Dow Jones Industrial Average and the S P 500 a reflection of lunar and planetary placements Many people are surprised to find that changes in price trends on the financial markets are a reflection of the changing psychological emotions of market participants Our emotions are impacted by the varying gravitational pulls and energy levels in our planetary cosmos Scientific techniques such as square root mathematics the Golden Mean the Golden Sequence and astrological phenomena like lunar events planetary transits and planetary aspects can thus be used to identify short term changes in price trend and long term market cycles In the early part of the 20th century many successful traders on Wall Street including the venerable W D Gann and the mysterious Louise McWhirter understood that emotion was intimately linked to the forces of nature They used these scientific techniques and astrological phenomena to predict changes to price trend and to profit from the markets The Lost Science will acquaint you with an extensive range of astrological and mathematical phenomena From the Golden Mean and Fibonacci Sequence through planetary transit lines and square roots to an examination of lunar astrology planetary aspects and market cycles the numerous illustrated examples in this book will assist you to deepen your understanding of the financial markets and make better informed and more timely trading and investing decisions      Marswalk One Shayler David, Andrew Salmon, Michael D. Shayler, 2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment The book accepts that the journey will be made but does not specify precisely when Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission objectives This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo Skylab Salyut Mir Shuttle and ISS Viking Luna Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate When the decision is finally made to go to Mars it will be made in the knowledge that most of the world knows why we are going and what benefits mankind will see for the effort The authors primary objective is to begin this understanding
