poetry The monograph thus models for readers modes of analysis and close reading that might be deployed in relation to recipes in order to understand better their allusive fragmentary and playful qualities as well as their wide ranging influence on medieval imaginations *The Index of Middle English Prose, Handlist XII* Ralph Hanna, 1997-09-04 The Index of Middle English Prose is an international collaborative project which will ultimately locate identify and record all extant Middle English prose texts composed between c 1200 and c 1500 in both manuscript and printed form in medieval and post medieval versions The first step towards this goal has been this series of Handlists each recording the holdings of a major library or group of libraries Compiled by scholars Handlists include detailed descriptions of each prose item with identifications categorisations and full bibliographical data Every Handlist will also contain a series of indexes including listings of opening and closing lines authors titles subject matter and rubrics For students of the middle ages Handlists provide essential bibliographical tools and shed light on a wide range of subjects
